This draft environmental assessment, prepared by the National Park Service, deals with the environmental consequences of Phase I of proposed road rehabilitation of US Route 209. The project is proposed just south of the Milford town limits, with the rehabilitation of culverts, bridges and retaining walls between Bushkill and Milford. Specifically, this project proposes road rehabilitation between mile markers 18.1 and 20.8, and road structure rehabilitation at mile marker 7.8, 10.9, 14.6, 17.4 and 18.3. There will

be traffic control and potential traffic delays associated with this work.

**SUPPLEMENTARY INFORMATION:** US Route 209 is a primary north-south road along the Pennsylvania -side of the Delaware River, connecting Interstate-80 (I-80) and Interstate-84 (I-84). Within the boundaries of Delaware Water Gap National Recreation Area, US Route 209 is a two-lane, undivided highway connecting the towns of Bushkill and Milford, Pennsylvania. This section of road is maintained by the National Park Service under the Federal Highways Program. The existing road surface has deteriorated and presents some potential safety-hazards. US Route 209 is an important north-south road within the park, and is a critical link for surrounding communities. The maintenance and repair of this road is vital to the annual average of 8,000 vehicles/day which use it.

The EA is available for public comment. Any member of the public may file a written comment. Comments should be addressed to the Superintendent, Delaware Water Gap National Recreation Area, River Road, Bushkill, PA 18324.
