Siebe Automotive North America, Knoxville, TN; Notice of Revised Determination on Reopening

On July 30, 1998, the Department issued a Negative Determination Regarding Eligibility to apply for worker adjustment assistance, applicable to workers and former workers of Siebe Automotive North America in Knoxville, Tennessee. The notice will be published shortly in the **Federal Register**.

By letter of August 11, 1998, the company requested administrative reconsideration regarding the Department's denial. New information provided by the subject firm and confirmed by the sole customer shows that the customer is using a different vendor who is manufacturing like or directly competitive articles in Canada and importing the finished product into the U.S.

Workers at the subject firm are engaged in employment related to the production of emission gas recirculating valves. The workers are not separately identifiable by product line.

Sales, production and employment at the Knoxville, Tennessee facility

declined during the relevant time period.

Conclusion

After careful review of the additional facts obtained on reopening, I conclude that increased imports of articles like or directly competitive with emission gas recirculating valves, contributed importantly to the decline in sales or production and to the total or partial separation of workers of Siebe Automotive North America in Knoxville, Tennessee. In accordance with the provisions of the Act, I make the following certification:

All workers of Siebe Automotive North America in Knoxville, Tennessee, who became totally or partially separated from employment on or after June 12, 1997 are eligible to apply for worker adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, D.C. this 27th day of August 1998.

Tri Americas, Incorporated, A/K/A Try America, Incorporated, El Paso, TX; Notice of Revised Determination on Reopening

On August 25, 1998, the Department, on its own motion, reopened its investigation for workers and former workers of the subject firm.

The initial investigation resulted in a negative determination issued on July 27, 1998, because the "contributed importantly" test of the Group Eligibility Requirements of the Trade Act was not met for workers at the subject firm. The workers produced men's high-end denim pants. The notice was published in the **Federal Register** on August 7, 1998 (63 FR 42433).

New information presented during a NAFTA-TAA petition investigation (NAFTA-2524) for the workers of the subject firm included a customer survey conducted by the Department for the time period relevant to the investigation. The survey results show that a major declining customer of the subject firm increased import purchases of jeans while decreasing purchases from the subject firm from 1996 to 1997
