

may be needed to maintain or achieve desired future conditions.

The desired outcome of the Limits of Acceptable Change planning process is to develop a consensus among the various stakeholders as to the best ways to manage the Gulkana River corridor within legislative constraints. Existing regulatory guidance for management of the Gulkana River corridor is provided by the Wild and Scenic Rivers Act (1968) and the Alaska National Interest Lands and Conservation Act (1980).

In December 1983 the Bureau of Land Management completed the initial River Management Plan for the Gulkana River. That report was entitled "Gulkana River. A Component of the National Wild and Scenic Rivers System". In that document the specific boundaries and management policies were established for the Gulkana National Wild River.

With increasing use and improved access to the Gulkana River system, the Bureau of Land Management proposes to update the River Management Plan through the use of the Limits of Acceptable Change. Results from the LAC planning process will be utilized by the Bureau of Land Management to determine what level of NEPA compliance and environmental analysis will be required to implement the proposed recommendations.

If reasonable accommodation is needed due to a disability, please contact the Equal Employment Opportunity Office at (916) 653-6952 or TDD (916) 653-6934 at least one week prior to the meeting.

**SUPPLEMENTARY INFORMATION:** The San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Bay-Delta system) is a critically important part of California's natural environment and economy. In recognition of the serious problems facing the region and the complex resource management decisions that must be made, the state of California and the Federal government are working together to stabilize, protect, restore, and enhance the Bay-Delta system. The State and Federal agencies with management and regulatory responsibilities in the Bay-Delta System are working together as CALFED to provide policy direction and oversight for the process.

One area of Bay-Delta management includes the establishment of a joint State-Federal process to develop long-term solutions in the Bay-Delta system related to fish and wildlife, water supply reliability, natural disasters, and water quality. The intent is to develop a comprehensive and balanced plan which addresses all of the resource problems. This effort, the CALFED Bay-Delta Program (Program), is being carried out under the policy direction of

CALFED. The Program is exploring and developing a long-term solution for a cooperative planning process that will determine the most appropriate strategy and actions necessary to improve water quality, restore health to the Bay-Delta ecosystem, provide for a variety of beneficial uses, and minimize Bay-Delta system vulnerability. A group of citizen advisors representing California's agricultural, environmental, urban, business, fishing, and other interests who have a stake in finding long term solutions for the problems affecting the Bay-Delta system has been chartered under the Federal Advisory Committee Act (FACA) as Advisory Council BDAC to advise CALFED on the program mission, problems to be addressed, and objectives for the Program. BDAC provides a forum to help ensure public participation, and will review reports and other materials prepared by CALFED staff. BDAC has established a subcommittee called the Ecosystem Roundtable to provide input on annual workplans to implement ecosystem restoration projects and programs.

Minutes of the meeting will be maintained by the Program, Suite 1155, 1416 Ninth Street, Sacramento, CA 95814, and will be available for public inspection during regular business hours, Monday through Friday within 30 days following the meeting.
