

commenter noted that observations made at fishway entrance 1 indicate that sea lions commonly forage at the face of the barrier gate, and out to about 10 feet (3.048 meters) below the barrier. One commenter questioned whether the barrier gate could be expanded from riverbank to riverbank to keep sea lions out of area.

**Response:** The EA has been modified to include additional observations on the barrier gate. The barrier gate prevents predation from occurring within the fish ladder at fishway entrance 1, but it has not stopped sea lions from foraging at the face of the barrier and areas adjacent to the fish ladder entrance. The installation of barrier gates at other fish ladder entrances will be assessed if foraging inside those entrances is noted. A physical barrier across the Willamette River is not feasible or practical.

**ACTION:** The EA has been modified as described in the responses to the comments. NMFS has evaluated the environmental consequences of the alternatives and has concluded that the proposed action is unlikely to result in any significant impacts on the human environment and, therefore, has made a finding of no significant impact (FONSI). The EA and FONSI have been prepared in accordance with National Environmental Policy Act (NEPA) and with implementing regulations at 40 CFR parts 1500 through 1508 and NOAA guidelines concerning implementation of NEPA found in NOAA Administrative Order 216-6.

Copies of the EA and FONSI are available (See **ADDRESSES**).

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of availability of revised marine mammal stock assessment reports.

**SUMMARY:** NMFS has incorporated public comments into revisions of marine mammal stock assessment

reports. The revision, which was initiated in 1996 is now complete, and copies of the revised reports are available to the public.

**ADDRESSES:** Printed copies may be obtained by writing to one of the following: Chief, Marine Mammal Division, Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Highway, Silver Spring, MD 20910-3226, Attn: Stock Assessments; Douglas P. DeMaster, Alaska Fisheries Science Center (F/AKC), NMFS, 7600 Sand Point Way, Seattle, WA 98115-0070 regarding Alaska regional stock assessments; James Lecky, Southwest Regional Office, NMFS, 501 West Ocean Boulevard, Long Beach, CA 90802-4213, regarding Pacific regional stock assessments; or Gordon Waring, Northeast Fisheries Science Center, NMFS, 166 Water Street, Woods Hole, MA 02543-1097 regarding Atlantic regional stock assessments.

**FOR FURTHER INFORMATION CONTACT:** Thomas C. Eagle, (301) 713-2322, Douglas P. **SUPPLEMENTARY INFORMATION:** Section 117 of the Marine Mammal Protection Act (MMPA) requires NMFS and the U.S. Fish and Wildlife Service to prepare stock assessment reports for all marine mammal stocks that occur in waters under the jurisdiction of the United States. These reports must contain information regarding the distribution and abundance of the stock, population growth rates and trends, estimates of annual human-caused mortality from all sources, descriptions of the fisheries with which the stock interacts, and the status of the stocks. NMFS completed the 1996 draft stock assessment reports and made them available for public review and comment on January 21, 1997 (62 FR 3005). During the public comment period and subsequent to it, NMFS consulted extensively with Scientific Review Groups (SRGs), established also under the MMPA, to discuss their comments, as well as the comments received from the public. The results of the different SRG discussions and comments received from the public, conservation organizations, state, and other Federal agencies were reviewed and incorporated into these final reports as appropriate. The 1996 final marine mammal stock assessment reports have now been completed and are available for distribution.
