

Jones Gulch; (3) to meet existing and anticipated skier demand through development of infrastructure consistent with advances in equipment, lift technology, and consumer preference; (4) to address some existing environmental concerns associated with historic activities and existing development. The EIS will tie to the White River National Forest Land and Resource Management Plan (Forest Plan) and Final EIS of September 20, 1984, which provides overall guidance for ski area management of the area. All activities associated with the proposal will be designed to maintain high quality resource objectives.

DATES: Written comments and suggestions should be postmarked or received by the Dillon Ranger District no later than 30 days after the publication of this notice. Send comments to Michael Liu, Attn: Keystone, Dillon Ranger District, P.O. Box 620, Silverthorne, Colorado, 80498, fax (970) 468-7735.

FOR FURTHER INFORMATION: Contact Michael Liu, Special Projects Coordinator, Dillon Ranger District, phone (970) 262-3440.

SUPPLEMENTARY INFORMATION: The proposed action includes construction of facilities entirely within Keystone Resort's Special Use Permit area. These facilities have been conceptually approved through previous National Environmental Policy Act analysis of the Resort's Master Development Plan (MDP). Specific elements of the proposed action include: Approximately 125 acres of trail construction, approximately 95 acres of additional snowmaking coverage, construction of three chair-lifts and one surface-lift, and construction of required service roads.

The project area is located on National Forest System lands within sections 19, 20, 29, 30, 31 and 32, Township 5 South, Range 76 West of the 6th P.M., all within Summit County, Colorado. Keystone Resort is located approximately 70 miles west of Denver, Colorado.

These improvements are consistent with Forest Plan and Regional Guide direction, and are considered necessary in light of current resort deficiencies, increased visitation experienced over the past decade, and projected future visitation increases. The proposed analysis will provide additional site-specific detail for portions of the existing MDP to accommodate changing socio-economic and environmental considerations, and may modify previous approvals shown in the MDP to avoid wetlands and other environmentally sensitive areas.

Preliminary Issues

Preliminary issues identified forest fragmentation and effects to: Wildlife, wetlands, water quality, mountain hydrology, geological stability, and the relationship of the project to future development of adjacent real estate. Additional issues will be identified during the scoping process.

Public Involvement and Scoping

Analysis of this proposal was originally planned under an Environmental Assessment (EA). After further study and additional information from resource specialists, the Forest Service has decided to prepare an EIS. Public scoping was conducted for the EA during October and November of 1997 through newspaper articles, letters to interested parties and two open houses. Comments previously submitted as part of the EA scoping process will be included in the documentation for the EIS and will be used to focus analysis and develop alternatives. Interested groups and individuals that have previously commented as part of the EA scoping process will be retained on the project mailing list.

The project proposal has been modified since originally submitted by Keystone Resort. The proposed Ski Tip Return Trail has been removed and one chairlift has been added to the proposal.

This environmental analysis and decision making process will enable additional interested and affected people to participate and contribute to the final decision. The Forest Service will seek information, comments, and assistance identifying issues from Federal, State, local agencies, federally recognized Native American tribes, and other individuals or organizations who may be interested in or affected by the proposal.

Completion of the draft EIS is anticipated during the late winter or spring of 1999. The final EIS should be completed some time during the late summer or fall of 1999. The comment period on the draft EIS will be 90 days from the date the Environmental Protection Agency publishes the "Notice of Availability" in the **Federal Register**.

Responsible Official

The Responsible Official for this project is Martha Ketelle, Forest Supervisor for the White River National Forest. The Responsible Official will document the decision and reasons for the decision in the Record of Decision issued concurrently with the release of the final EIS. That decision will be subject to appeal under 36 CFR 215.

Dated: November 3, 1998.

Martha Ketelle,

Forest Supervisor, White River National Forest.

Brake Rotors From the People's Republic of China: Postponement of Final Results of Antidumping Duty New Shipper Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of extension of the time limit for the final results of the new shipper administrative review of the

antidumping duty order on brake rotors from the People's Republic of China.

SUMMARY: The Department of Commerce (the Department) is extending the time limit for the final results of the new shipper administrative review of the antidumping duty order on brake rotors from the People's Republic of China (PRC). This review covers the period April 1, 1997, through September 30, 1997.

EFFECTIVE DATE: November 10, 1998.

FOR FURTHER INFORMATION CONTACT: Brian Smith or Everett Kelly, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482-1766 or (202) 482-4194, respectively.

Postponement of Preliminary Results of Review

On November 28, 1997, the Department initiated a new shipper review of the antidumping duty order on brake rotors from the PRC for China National Industrial Machinery Import & Export Co., Lai Zhou Auto Brake Equipments Factory, Longkou Haimeng Machinery Co., Ltd., Qingdao Gren (Group) Co., and Yantai Winhere Auto Part Manufacturing Co., Ltd. (62 FR 64206, December 4, 1997). On September 29, 1998, the Department made its preliminary determination in the above-referenced review (63 FR 51895, September 29, 1998). The current deadline for the final results in this new shipper review is December 23, 1998. In accordance with section 751(a)(2)(B)(iv) of the Tariff Act of 1930, as amended, the Department finds this new shipper review extraordinarily complicated because the large number of respondents and is extending the time limit for completion of the final results until February 23, 1999, which is 150 days after the date on which the preliminary results were issued.

Dated: November 4, 1998.

Louis Apple,

Acting Deputy Assistant Secretary for Import Administration.

Brake Rotors From the People's Republic of China: Postponement of Preliminary Results of Antidumping Duty New Shipper Administrative Review and First Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of extension of the time limit for the preliminary results in the antidumping duty new shipper administrative review and first administrative review of the antidumping duty order on brake rotors from the People's Republic of China.

SUMMARY: The Department of Commerce (the Department) is extending the time limit for the preliminary results of the antidumping duty new shipper administrative review and first administrative review of the antidumping duty order on brake rotors from the People's Republic of China (PRC). This review covers the period October 1, 1996, through March 31, 1998.

EFFECTIVE DATE: November 10, 1998.

FOR FURTHER INFORMATION CONTACT: Brian Smith or Everett Kelly, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482-1766 or (202) 482-4194, respectively.

Postponement of Preliminary Results of Review

The Department initiated a new shipper review of the antidumping duty order on brake rotors from the PRC (63 FR 28355) on May 22, 1998 and, on May 29, 1998, initiated the first administrative review of the antidumping duty order on brake rotors from the PRC (63 FR 29370). Pursuant to section 351.214(j)(3) of its regulations, and with the agreement of Yantai Chen Fu Machinery Co. Ltd., (Yantai Chen Fu) the Department is conducting the 1996-1998 administrative review and the new shipper review of Yantai Chen Fu concurrently. The current deadline for the preliminary results in these reviews is January 4, 1999. In accordance with section 751(a)(3)(A) of the Tariff Act of 1930 ("the Act"), as amended, we determine that it is not practicable to complete these reviews within the original time frame because of the large

number of respondents.¹ Further, in accordance with section 751(a)(2)(B)(iv) of the Act, the Department finds the concurrent new shipper review extraordinarily complicated because it is being conducted with the administrative review of a large number of respondents. Thus the Department is extending the time limit for completion of the preliminary results until April 30, 1999, which is 365 days after the last day of the anniversary month of the order.

The final determination will occur within 120 days of the publication of the preliminary results.

Dated: November 4, 1998.

Louis Apple,

Acting Deputy Assistant Secretary for Import Administration.
