In response to these and other concerns raised by federal, state, and local interests during the 1997 Reconnaissance Study, the Corps of Engineers has initiated a Feasibility Study to determine if a feasible plan exists for flood control along Murrieta Creek with associated environmental restoration and recreation components.

environmental analysis. Useful information includes other environmental studies, published and unpublished data, historical photos of the area, alternatives that should be addressed in the analysis, and potential environmental enhancement and restoration opportunities that exist along the creek. Individuals and agencies may offer information or data relevant to the proposed study and provide comments by attending the public scoping meeting, or by mailing the information to Mr. David Compas before 10 January 1999. Requests to be placed on the mailing list for announcements and the Draft EIS/R should also be sent to Mr. David Compas.
