

issuing EFPs are contained in the implementing regulations.

NMFS received an application for an EFP from Edward F. Melvin, University of Washington, Washington Sea Grant Program, on February 23, 1999. The purpose of the EFP is to conduct an experiment to assess alternative seabird bycatch avoidance measures for hook-and-line gear fisheries off Alaska. Results from the experiment could be used by NMFS to establish more effective regulatory measures to reduce seabird bycatch in these fisheries.

In accordance with § 679.6(c)(2), NMFS has determined that the proposal warrants further consideration and has initiated consultation with the Council. The Council will consider the EFP application during its April 19–23, 1999, meeting, which will be held at the Hilton Hotel, Anchorage, AK. The applicant has been invited to appear in support of the application.

A copy of the application is available for review from the NMFS Regional Administrator (see ADDRESSES).

Title and OMB Control Number: Youth Attitude Tracking Study (YATS), OMB Number 0704-0069.

Needs and Uses: This information collection requirement is necessary to enable DoD and the Recruiting Services to annually ascertain changes in youth attitudes that affect recruiting budgets, and to support analysis of recruiting incentives and diagnosis of recruiting difficulties. YATS provides an independent measure of youth awareness of DoD and Service recruiting advertising, and an efficient measure of potential incentives, such as increased educational benefits. The information is used to optimize allocation of resources

and evaluate the effect of policy changes. It is used in preparing testimony for Congress on the state of recruiting.

Affected Public: Individuals and households.

Annual Burden Hours: 5,618.

Number of Respondents: 13,050.

Responses Per Respondent: 1.

Average Burden Per Response: 25.83 minutes.

Frequency: Annual/On Occasion.

SUPPLEMENTARY INFORMATION:

Summary of Information Collection

Each Fall, computer-assisted telephone interviews (CATI) are conducted with a representative sample of 10,000, 16 to 24 year-old men and women who have never served in the military. Additionally, up to 3,000 interviews are conducted in the Spring or Summer to support special needs. The interviews provide information needed to track propensity for military service, to evaluate recruiting efforts, and to determine youth attitudes and opinions relevant to recruiting policy decisions (e.g., the impact of educational benefits on propensity for military service). CATI technology is used to assure conversational, "user-friendly" interviews, and to focus questions on relevant subpopulations. YATS does not include intrusive questions of a personal nature. Results are disseminated only through reports of aggregate statistics and public-use data files which include no personally identifying information. Thus, the confidential nature of all responses is protected.
