Administration for Children and Families

Submission for OMB Review; Comment Request

Title: Family Preservation and Family Support (FP/FS) Services Implementation Study—State Level Data Collection.

OMB: 0970-0137.

Description: The Omnibus Budget Reconciliation Act of 1993 (OBRA 93)

established title IV-B, subpart 2 of the Social Security Act (42 U.S.C. 62-628) to provide funds to states for the development of family preservation and family support programs and services. Subpart 2, Section 435 of OBRA 93 requires the Secretary of HHS to evaluate the effectiveness of programs carried out under the legislation. The Adoption and Safe Families Act of 1997, P.L. 105-89, reauthorized the family preservation and family support programs and services and amended Section 431 [42 U.S.C. 629a] to add two new services: Time-Limited Family Reunification Services and Adoption Promotion and Support Services.

In this second phase of data collection, the five data collection instruments, which were used during the previous phase (1996-1999) will be used. Each instrument is geared toward obtaining information from individuals/agencies who will have a slightly different perspective on the context, planning, and implementation of the legislation. The data collection instruments will seek information on the programs and services funded, the goals of the planning process, populations targeted, reform efforts initiated, the relationship between

family preservation, family support and child welfare, staffing and training, information systems.

Data collection on states' planning and implementation experiences will be accomplished through semi-structured interviews with state officials and other key stakeholders who are knowledgeable about child welfare.

Both qualitative and quantitative analyses will be completed to highlight the process states employ to implement the legislation, coordinate with other funding sources, develop new systems, and improve service delivery systems. Data analyses also will focus on the impact of legislative changes on the state implementation of the program and comparisons of state implementation before and after the legislative reauthorization. Information obtained from data analyses will provide feedback to ACF in the determination of future policy guidance and the scope and nature of technical assistance to be provided to states. The information will also provide direct feedback to states concerning successful implementation strategies.

Respondents: State, Local or Tribal Government and Not-for-Profit Institutions.
