

responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20246. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, at the above address. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application.

**Linwood A. Watson, Jr.,**

*Acting Secretary.*

### Agency Information Collection Activities: Submission for OMB Review; Comment Request; NSPS Metallic Mineral Processing Plants

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: NSPS Subpart LL, Metallic Mineral Processing Plants, OMB Control Number 2060-0016, expiration date 06/30/99. The ICR describes the nature of the information collection and its expected burden and cost, and where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before July 6, 1999.

**FOR FURTHER INFORMATION CONTACT:** Sandy Farmer at EPA by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download a copy of the ICR off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 0982.06.

**SUPPLEMENTARY INFORMATION:** Title: NSPS Subpart LL, Metallic Mineral Processing Plants, OMB Control No.

2060-0016, EPA ICR No. 0982.06, expiration date 6/30/99. This is a request for revision of a currently approved collection.

**Abstract:** The New Source Performance Standards (NSPS) for Metallic Mineral Processing Plants were proposed on August 24, 1982 and promulgated on February 21, 1984. These standards apply to the following facilities in Metallic Mineral Processing Plants: each crusher and screen in open-pit mines; each crusher, screen, bucket elevator, conveyor belt transfer point, thermal dryer, product packaging station, storage bin, enclosed storage area, truck loading and unloading station at the mill or concentrator, commencing construction, modification or reconstruction after the date of proposal. The NSPS does not apply to facilities located in underground mines, or to facilities performing the beneficiation of uranium ore at uranium ore processing plants.

Particulate matter (PM) is the pollutant regulated under this Subpart. The standards limit the particulate matter emissions from the stack to 0.05 grams per dry standard cubic meter and to 7% opacity. Those sources which are using a wet scrubbing control device are exempted from the 7% opacity requirement. No affected facility may discharge any process fugitive emissions that exhibit greater than 10% opacity.

Response to the collection of information is mandatory under 40 CFR part 60. Owners or operators of the affected facilities described must make initial notifications, including notification of any physical or operational change to an existing facility which may increase the regulated pollutant emission rate; notification of the demonstration of the continuous monitoring system (CMS), and notification of the initial performance test. Performance test reports are needed as these are the Agency's records of a source's initial capability to comply with emission standards, and note the operating conditions, flow rate and pressure drop, under which compliance was achieved. Owners of affected facilities are required to install, calibrate, maintain, and operate a continuous monitoring system to measure the change in the pressure of the gas stream through the scrubber and the scrubbing liquid flow rate. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shut down, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative.

Semiannual excess emissions reports and monitoring systems performance reports will include the exceeded findings of any control device operating parameters, (specified in 40 CFR 60.735, Recordkeeping and Reporting), the date and time of the deviance, the nature and cause of the malfunction (if known) and the corrective measures taken, and identification of the time period during which the CMS was inoperative (this does not include zero and span checks or typical repairs/adjustments). These notifications, reports and records are required, in general, of all sources subject to NSPS.

This information is being collected to assure compliance with 40 CFR part 60. Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, (as specified in part 60.735, Recordkeeping and Reporting). These notifications, reports and records are required, in general, of all sources subject to NSPS.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on September 4, 1998. No comments were received.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 40 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Owners and Operators of Metallic Mineral Processing Plants.

**Estimated Number of Respondents:** 22.

**Frequency of Response:** Semiannually.

*Estimated Total Annual Hour Burden:* 1,760 hours.

*Estimated Total Annualized Capital, O&M Cost Burden:* \$14,300.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses: Please refer to EPA ICR No. 0982.06 and OMB Control No. 2060-0016 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Office of Policy, Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460;

and

Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503.

Dated: May 27, 1999.

### Agency Information Collection Activities: Submission for OMB Review; Comment Request, Wood Preservatives—Submission of Information Regarding Arsenic Exposure Levels in Wood Treatment Plants

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: Wood Preservatives—Submission of Information Regarding Arsenic Exposure Levels in Wood Treatment Plants, OMB control number 2070-0081, Expiration date: July 31, 1999. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before July 6, 1999.

**FOR FURTHER INFORMATION CONTACT:** Sandy Farmer at EPA by phone at (202) 260-2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download a copy of the ICR off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 1289.05.

**SUPPLEMENTARY INFORMATION:** *Title:* Wood Preservatives—Submission of Information Regarding Arsenic Exposure Levels in Wood Treatment Plants, (OMB Control No. 2070-0081; EPA ICR No. 1289.05.) Expiring 07/31/99. This is a request for an extension of a currently approved collection.

*Abstract:* This data collection program, in which participation is voluntary, is designed to provide certification and supporting test data to determine whether wood preserving facilities are protecting their workers from unsafe exposure to airborne inorganic arsenic. If air monitoring tests indicate that levels of airborne arsenic are safe and the facility submits the appropriate test data and certification, the facility can voluntarily exempt itself from the requirement to use personal respirators while pressure treating lumber. The requirement to wear respirators is considered the most burdensome requirement of the pesticide labels, which must be followed once a pesticide, in this case a wood treating formulation, is registered under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA). Since the submission to EPA does not contain confidential business information it will not be treated as such. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The Federal Register Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on January 5, 1999 (64 FR 509). No comments were received.

*Burden Statement:* The annual public reporting and record keeping burden for this collection of information is estimated to average 5.1 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing

and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

*Respondents/Affected Entities:*

Participating facilities are those that use formulations of inorganic arsenic to treat wood.

*Estimated Number of Respondents:* 250.

*Frequency of Response:* Annual.

*Estimated Total Annual Hour Burden:* 1284.

*Estimated Total Annualized Capital and O&M Cost Burden:* 0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1289.05 and OMB Control No. 2070-0081 in any correspondence.
