

at 56 FR 50148. Notice of issuance of the Presidential Permit and Finding of No Significant Impact was published in the **Federal Register** on November 16, 1994 at 59 FR 59267. The bridge will carry pedestrian and commercial traffic, and is intended to relieve the traffic burden on existing bridges in the downtown area. As a condition for the Presidential Permit, the City of Laredo has agreed to route all commercial traffic to this new bridge or to the Colombia Bridge, which connects the City of Laredo to the State of Nuevo Leon. Further, the City has agreed that all hazardous materials will be directed to the Colombia Bridge, where the U.S. Customs Service operates a hazardous materials containment facility. The new bridge is needed because the two existing international bridges between downtown Laredo and Nuevo Laredo cannot accommodate additional traffic without further safety and environmental degradation. The permit was amended to specify that the permit holder (City of Laredo) is authorized to align the approach road to the bridge in accordance with any of four alternatives that have been found to have no significant environmental impact.

The application for the Amended Presidential Permit was reviewed and approved by numerous federal, state and local agencies. The final application and environmental assessment were reviewed and approved or accepted by the Immigration and Naturalization Service, General Services Administration, Department of Interior, Department of Agriculture, Department of Commerce, U.S. Customs Service, U.S. Coast Guard, Federal Highway Administration, Food and Drug Administration, International Boundary and Water Commission—U.S. Section, Department of Defense, the Environmental Protection Agency, the Department of State and the appropriate Texas State Agencies—the Parks and Wildlife Department, the Department of Transportation, the Historical Commission and the Natural Resource Conservation Commission.
