Alternative A continues the existing management direction of the park. Alternative B proposes rehabilitation of large-scale landscape patterns on the 1863 battlefield and in the Soldiers' National Cemetery, the development of a new museum complex, enhanced interpretation and resource management. Alternative C, the proposed plan, proposes the rehabilitation of features significant to the Battle of Gettysburg and to the Soldiers' National Cemetery, a new museum complex, enhanced and expanded interpretation, and enhanced resource management. Alternative D proposes restoration of the 1863 battlefield, the Soldiers' National Cemetery and the commemorative areas of the park, a new museum complex, interpretation using the historic tablets, markers and monuments of the park and enhanced resource management.

The FGMP/EIS in particular evaluates the environmental consequences of the proposed action and the other alternatives on: The historic landscapes of the park; collections and archives; buildings and structures; threatened, endangered and sensitive species; other species; socioeconomics; traffic, parking and transit; and park operations.

SUPPLEMENTARY INFORMATION: The San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Bay-Delta system) is a critically important part of California's natural environment and economy. In recognition of the serious problems facing the region and the complex resource management decisions that must be made, the state of California and the Federal government are working together to stabilize, protect, restore, and enhance the Bay-Delta system. The State and Federal agencies with management and regulatory responsibilities in the Bay-Delta system are working together as CALFED to provide policy direction and oversight for the process.

One area of Bay-Delta management includes the establishment of a joint State-Federal process to develop long-term solutions to problems in the Bay-Delta system related to fish and wildlife, water supply reliability, natural disasters, and water quality. The intent is to develop a comprehensive and balanced plan which addresses all of the resource problems. This effort, the CALFED Bay-Delta Program (Program), is being carried out under the policy direction of CALFED. The Program is exploring and developing a long-term

solution for a cooperative planning process that will determine the most appropriate strategy and actions necessary to improve water quality, restore health to the Bay-Delta ecosystem, provide for a variety of beneficial uses, and minimize Bay-Delta system vulnerability. A group of citizen advisors representing California's agricultural, environmental, urban, business, fishing, and other interests who have a stake in finding long-term solutions for the problems affecting the Bay-Delta system has been chartered under the Federal Advisory Committee Act (FACA). The BDAC provides advice to CALFED on the program mission, problems to be addressed, and objectives for the Program. BDAC provides a forum to help ensure public participation, and will review reports and other materials prepared by CALFED staff. BDAC has established a subcommittee called the Ecosystem Roundtable to provide input on annual workplans to implement ecosystem restoration projects and programs.

Minutes of the meeting will be maintained by the Program, Suite 1155, 1416 Ninth Street, Sacramento, CA 95814, and will be available for public inspection during regular business hours, Monday through Friday within 30 days following the meeting.
