

for terms of less than 20 years is the average of the rates published in the Bond Buyer for the same four weeks in the table of "Municipal Market Data—General Obligation Yields" or the successor to this table. No interest rate may exceed the interest rate for Water and Waste Disposal loans.

The table of Municipal Market Data includes only rates for securities maturing in 1999 and at 5 year intervals thereafter. The rates published by RUS reflect the average rates for the years shown in the Municipal Market Data table. Rates for interest rate terms ending in intervening years are a linear interpolation based the average of the rates published in the Bond Buyer. All rates are adjusted to the nearest one eighth of one percent (0.125 percent) as required under § 1714.5(a). The market interest rate on Water and Waste Disposal loans for this quarter is 5.125 percent.

In accordance with § 1714.5, the interest rates are established as shown in the following table for all interest rate terms that begin at any time during the third calendar quarter of 1999.

DEPARTMENT OF COMMERCE

Census Bureau

Census 2000 Accuracy and Coverage Evaluation—Housing Unit and Person Activities

ACTION: Proposed collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before August 27, 1999.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5033, 14th and Constitution Avenue, NW, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Magdalena Ramos, Bureau of the Census, Room 2126A/SFC2, Washington, DC 20233, (301) 457-4295.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Bureau of the Census developed the Accuracy and Coverage Evaluation approach for measuring coverage of the population in the decennial census. In the Accuracy and Coverage Evaluation, we independently count a sample of housing units and the people living in those units, then compare those results to the census. We then use this comparative information to produce final estimates of the coverage for Census 2000. The Accuracy and Coverage Evaluation approach was tested during the Census 2000 Dress Rehearsal in Columbia, South Carolina. The Accuracy and Coverage Evaluation was formerly referred to as the Post-

Enumeration Survey in the Census 2000 Dress Rehearsal.

The Independent Listing Operation is the first step in the Accuracy and Coverage Evaluation process. During the Independent Listing, the Bureau of the Census will obtain a complete housing inventory of all addresses within the Census 2000 Accuracy and Coverage Evaluation sample of block clusters before the Census 2000 enumeration commences. The materials for the Independent Listing have been submitted to the Office of Management and Budget and are awaiting approval.

The address listings will be matched to the address list used in the census; the unmatched cases will be sent to the field for reconciliation during the Accuracy and Coverage Evaluation Housing Unit Follow-up Operation using the Housing Unit Follow-up Questionnaires, Forms D-1303 and D-1303 PR. The D-1303 is the English language version and will be used in the Accuracy and Coverage Evaluation sample areas in the 50 states and the District of Columbia; the D-1303 PR is the Spanish language version of the follow-up form and will be used only in sample areas in Puerto Rico. For quality assurance purposes, a sample of the housing unit follow-up cases will be verified to ensure that the follow-up enumerators visit the block clusters, resolve the cases, and correctly follow procedures. The information obtained using the D-1303 and D-1303 PR will be used to resolve match status for unmatched cases and to assign final match codes. The results from the matching will be used to identify clusters for the Targeted Extended Search (TES) Operation.

The TES attempts to correct erroneous enumerations and nonmatches caused by census geocoding errors. A geocoding error occurs when a housing unit is counted in the wrong Accuracy and Coverage Evaluation sample cluster. Because of geocoding errors, the people in the housing units can be counted in the incorrect block and, as a result, may be counted more than once. The housing units in the TES clusters are sent to the field for resolution using the Targeted Extended Search Field Followup Questionnaires, Forms D-1360 and D-1360 PR. The D-1360 is the English language version and will be used in the Accuracy and Coverage Evaluation sample areas in the 50 states and the District of Columbia; the D-1360 PR is the Spanish language version and will be used only in sample areas in Puerto Rico. The goal of the TES field follow-up is to determine the correct geographic location of the housing units in the cluster. The results of TES field

follow-up will be used during person matching to allow the clerical matchers to correctly code the people in the TES clusters. The TES will be conducted during the same time period as the Person Interview. The resultant address listing from the Housing Unit Follow-up Operation will be used in the Person Interview.

The Person Interview will be conducted using a Computer Assisted Personal Interviewing (CAPI) instrument. During the initial phase of this operation, the Census Bureau will target sample cases for telephone interviews. This is done to allow interviewing to start since personal visits cannot be done until Nonresponse Follow-up for Census is 90 percent complete. Telephone cases will be city style addresses selected from households that returned their census questionnaires and provided their telephone numbers. After the conclusion of the Nonresponse Follow-up Operation for a sample block cluster, all remaining sample cases will be interviewed using a person-to-person approach. Telephone interviews may also be used later in the process for hard to enumerate areas or situations.

Intensive probing techniques will be used to reconstruct a roster of the sample housing unit. The interviewer will attempt to determine the status of the sample units and their occupants on Census Day, April 1, 2000. For households where the Census Day residents have moved out, we will obtain a proxy interview from the current residents or another reliable proxy. When combined with our efforts to match responses to the results of the census count, the interview data will identify persons missed or incorrectly included in the census as well as persons correctly enumerated. For quality assurance, a sample of respondents in the Accuracy and Coverage Evaluation sample will be reinterviewed using the CAPI instrument. There will be a Spanish language version of the instrument that will be available for use in the 50 states, District of Columbia, and Puerto Rico.

After the person interview, person matching for input into dual system estimation (DSE) processing will be conducted. The estimation is called DSE because two independent sources of information or systems are used. The people enumerated during the Person Interview Operation will be matched to the people enumerated in the census for the same addresses. Unresolved cases will be reconciled in the field during the Accuracy and Coverage Evaluation Person Follow-up Interview using the Person Follow-up Questionnaires,

Forms D-1301, D-1301(S), and D-1301 PR. The D-1301 is the English language version and will be used in the sample areas in the 50 states and the District of Columbia except in selected areas; the D-1301(S) and D-1301 PR are Spanish language versions of the follow-up form. The D-1301(S) will be used in sample areas, where needed, in the 50 states and the District of Columbia; the D-1301 PR will be used only in sample areas in Puerto Rico. The completed follow-up interview files will be reviewed and used to resolve a person's residence status and match status. The person follow-up interview will undergo a quality assurance operation to ensure that the interviewer contacted the household and conducted an interview. The information from the person interview will be used in the Census 2000 coverage estimates.

Because the initial housing unit operations (matching and field follow-up) are conducted before the inventory of census housing units is final, a final housing unit match and field reconciliation are needed for selected cases that were not followed up during the original housing unit operations. The field reconciliation will be conducted using the Final Housing Unit Follow-up Questionnaires, Forms D-1340 and D-1340 PR. The D-1340 is the English language version and will be used in the Accuracy and Coverage Evaluation sample areas in the 50 states and the District of Columbia; the D-1340 PR is the Spanish language version of the follow-up form and will be used only in sample areas in Puerto Rico. As in the initial Housing Unit operation, a sample of the housing unit follow-up cases will be verified to ensure that the follow-up enumerators visit the block clusters, resolve the cases, and correctly follow procedures. The results of the final housing match are needed to produce housing unit coverage estimates.

Bureau of Export Administration

Action Affecting Export Privileges; Kenneth Broder; Order Amending the Order Denying Permission To Apply for or Use Export Licenses

In the Matter of: Kenneth Broder, Calle Rafael Agosto Sanchez No. 22 Torre, Don Roberto Ens. Piantini, Apartado (Post Office Box) 30298, Santo Domingo, Dominican Republic.

On February 2, 1999, I entered an order against Kenneth Broder (Broder) denying his export privileges until February 2, 2007, based upon his February 2, 1998, conviction in the United States District Court for the Southern District of Florida of violating the International Emergency Economic Powers Act (50 U.S.C.A. §§ 1701-1706 (1991 & Supp. 1999)) (IEEPA). The Order was issued under the authority of Section 11(h) of the Export Administration Act of 1979, as amended (currently codified at 50 U.S.C.A. app. §§ 2401-2420 (1991 & Supp. 1999)) (the Act),¹ and Sections 766.25 and 750.8(a)

¹ The Act expired on August 20, 1994. Executive Order 12924 (3 CFR, 1994 Comp. 917 (1995)), extended by Presidential Notices of August 15, 1995 (3 CFR, 1995 Comp. 501 (1996)), August 14, 1996 (3 CFR, 1996 Comp. 298 (1997)), August 13, 1997 (3 CFR, 1997 Comp. 306 (1998)), and August 13, 1998 (3 CFR, 1998 Comp. 294 (1999)), continued

of the Export Administration Regulations (currently codified at 15 CFR Parts 730-774 (1999)) (the Regulations).

On March 19, 1999, Broder, through counsel, filed an appeal from the Order with the Under Secretary for Export Administration (Under Secretary), pursuant to Part 756 of the Regulations. On June 10, 1999, the Under Secretary issued his final decision on that appeal and granted partial relief from the terms of the Order by allowing Broder to participate in transactions involving EAR99 items for use or consumption in the Dominican Republic. In order to give effect to his decision, the Under Secretary directed that I amend my February 2, 1999 Order to suspend its application to EAR99 items that are exported or reexported to the Dominican Republic by Broder or on his behalf for use or consumption there.

Accordingly, the February 2, 1999 Order is hereby amended to read as follows:

Ordered

I. Until February 2, 2007, Kenneth Broder, Calle Rafael Agosto Sanchez No. 22 Torre, Don Roberto Ens. Piantini, Apartado (Post Office Box) 30298, Santo Domingo, Dominican Republic, may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as "item") exported or to be exported from the United States, that is subject to the Regulations, or in any other activity subject to the Regulations, including, but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations; or

C. Benefiting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

II. No person may, directly or indirectly, do any of the following:

the Export Administration Regulations in effect under IEEPA.
