

Army Corps of Engineers' Red River Lock and Dam No. 3, and would consist of the following facilities: (1) six new steel penstocks, each about 100-foot-long and 10.5-foot-in-diameter; (2) a new powerhouse to be constructed on the downstream side of the dam having an installed capacity of 49,000 kilowatts; (3) a new 500-foot-long, 14.7-kilovolt transmission line; and (4) appurtenant facilities. The proposed average annual generation is estimated to be 300 gigawatt-hours. The cost of the studies under the permit will not exceed \$5,000,000.

m. Available Locations of Application: A copy of the application is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 888 First Street, N.E., Room 2-A, Washington, D.C. 20426, or by calling (202) 219-1371. A copy is also available for inspection and reproduction at Universal Electric Power Corp., Mr. Ronald S. Feltenberger, 1145 Highbrook Street, Akron, Ohio 44301, (330) 535-7115. A copy of the application may also be viewed or printed by accessing the Commission's website on the Internet at <http://www.ferc.fed.us/online/rims.htm> or call (202) 208-2222 for assistance.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

Preliminary Permit—Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit applications or notices of intent. Any competing preliminary permit or development application or notice of intent to file a competing preliminary permit or development application must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent to file competing applications may be filed in response to this notice. A competing license application must conform with 18 CFR 4.30 (b) and 4.36.

Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. An additional copy must be sent to Director, Division of Project Review, Federal Energy Regulatory Commission, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Linwood A. Watson, Jr.,

Acting Secretary.

Agency Information Collection Activities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): National Emission Standards for Hazardous Air Pollutants for the Printing and Publishing Industry, EPA ICR No. 1739.02, and OMB Control Number 2060-0335, expiration date July 31, 1999. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before September 27, 1999.

ADDRESSES: U.S. Environmental Protection Agency, 401 M Street SW, Mail code 2224A, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Ginger Gotliffe at (202) 564-7072, fax (202) 564-0009, or e-mail (gotliffe.ginger@epamail.epa.gov).

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those owners or operators of publication rotogravure, product and packaging rotogravure, or wide-web flexographic printing presses who are covered by 40 CFR part 63, subpart KK. The compliance date for an owner or operator of an existing affected source subject to the provisions of this subpart is May 30, 1999. The compliance date for an owner or operator of a new affected source subject to the provisions of this subpart is immediately upon start up of the affected source or May 30, 1996, whichever is later.

Title: MACT Subpart KK, National Emission Standards for Hazardous Air Pollutants for the Printing and Publishing Industry; OMB No. 2060-0335.

Abstract: Owners or operators of the affected facilities described make the following one-time only reports of start of construction, anticipated and actual startup dates, and physical or operational changes to existing facilities. Respondents using control devices other than incinerators or

solvent recovery systems must submit a request for approval of the control device to EPA. The General Provisions also require that an affected source with an initial startup date before the effective date of the relevant standard under Part 63 submit a one-time initial notification. This notification must be submitted one year before the compliance deadline. For sources constructed or reconstructed after the effective date of the relevant standard, the General Provisions require that the source submit an application for approval of construction or reconstruction. The application is required to contain information on the air pollution control device that will be used for each potential HAP emission point. The information in the initial notification and the application for construction or reconstruction will enable enforcement personnel to identify the sources subject to the standards and to identify those sources that are already in compliance.

The General Provisions also require that affected sources submit a notification of compliance status. This notification must be signed by a responsible company official who certifies its accuracy and certifies that the source has complied with the relevant standards. Performance test results also are included in the compliance status report. The notification of compliance status must be submitted within 60 days after the compliance date for the affected source.

In addition, affected sources demonstrating compliance through the operation of continuous monitoring systems (CMS) are required by the General Provisions to conduct a performance evaluation of the CMS. A report of the performance evaluation results is required to be submitted to EPA. Respondents operating a control device who do not operate a continuous emissions monitoring system must monitor incinerator temperatures as well as a parameter representing the performance of the capture system. Excess emissions and CMS performance reports documenting excess emissions and parameter monitoring exceedances are also required to be submitted to the Agency semiannually.

Respondents operating solvent recovery systems who do not operate a continuous emissions monitoring system must conduct monthly material balances and keep records of these material balances as well as organic HAP and volatile matter usage. Respondents complying with the regulation through the use of low HAP materials, or through the use of a control device in combination with low

HAP materials must keep records of monthly HAP use, materials use, and solids contents of materials applied. HAP use reports are required annually by sources using the provisions of the rule to establish area source status.

The General Provisions require owners or operators that comply by means of control devices to develop startup, shutdown, and malfunction plans, documenting procedures that will be followed in the case of these events. Startup, shutdown and malfunction reports also are required to be submitted, demonstrating the actions taken by an owner or operator in the event of a startup, shutdown, or malfunction. When actions taken are consistent with the plan, reports are required semiannually. When actions taken are inconsistent with the plan, reports must be submitted within two working days.

All reports and records must comply with the General Provisions for 40 CFR part 63. All records must be maintained by the affected source for a period of 5 years. The information collected will be used by the Administrator to determine that all sources subject to the NESHAP are achieving the standards.

All requests, applications, and reports are submitted to the respondent's State agency, if it has an approved title V permit program implementation authority. Otherwise, this information is submitted to the appropriate Regional Office of the Environmental Protection Agency (EPA) as indicated in section 63.13 of the General Provisions.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of

information technology, e.g.: permitting electronic submission of responses.

Burden statement: The average annual burden hours for each respondent is as follows: Performance testing, notification and reporting is 282 hours, CMS testing and installing is 500 hours, CMS maintenance, records, and reporting is 398 hours, and all other reporting and recordkeeping is 325 hours. There are 180 affected facilities. Because the performance testing and CMS testing and installation may be a one time occurrence and because the "other recordkeeping" category includes hours that would only be used if the facility is not using a CMS, the hours are not totaled into one value. The average total annual cost for reporting for the first three years is \$9186.00 per facility. Total annualized capital/startup costs for monitoring equipment purchases to comply with this rule are estimated at \$20,000 per respondent using CMS. Costs for operation and maintenance of this equipment are estimated at \$9,000 per year per respondent for the first three years after promulgation.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: July 22, 1999.

Elliott Gilberg,

Division Director, CCSMD, OC.
