#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 et. seq.) imposed prohibitions against the taking of endangered species. Section 10 of the ESA allows permits authorizing the taking of endangered species for research/enhancement purposes. The corresponding regulations established procedures for persons to apply for such permits. In addition, the regulations set forth specific reporting requirements for such permit holders.

The regulations contain two sets of information collections: (1) applications for research/enhancement permits, and (2) reporting requirements for permits issued.

The required information is used to evaluate the impacts of the proposed activity on endangered species, to make the determinations required by the ESA prior to issuing a permit, and to establish appropriate permit conditions. In order to issue permits as under ESA section 10(a)(1)(A), NMFS must determine that (1) such exceptions were applied for in good faith, (2) if granted and exercised will not operate to the disadvantage of such endangered species, and (3) will be consistent with the purposes and policy set forth in section 2 of the ESA.

##### II. Method of Collection

Permit applicants must submit a written application to NMFS, including all appropriate information listed on the instructions. These instructions are a user-friendly version of the requirements at 50 CFR § 222.23(b) for applications for research/enhancement permits.

Once issued, the permit requires that permit holders submit an annual report on activities, including information on the species, stocks, dates, location, and condition of animals taken.
