September 3, 1999.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Request for Office of Management and Budget Emergency Processing of proposed information collection and request for comments.

SUMMARY: In compliance with the requirements of Section 3507(j)(1) of the Paperwork Reduction Act of 1995 (Pub. L. No. 104–13), and 5 CFR 1320.13 of the Office of Management and Budget (OMB) regulations, the Federal Energy Regulatory Commission (Commission) is providing notice of its request to OMB for emergency processing of a proposed collection of information request on the specific aspects of the information collection described below. OMB approval has been requested by September 8, 1999. A copy of this information collection request (ICR), with applicable supporting documentation, may be obtained by calling the Commission's Information Clearance Officer, Michael Miller at (202)208–1415. Comments and questions about the ICR listed below should be directed to the Office of Information and Regulatory Affairs, Attn: FERC Desk Officer, Office of Management and Budget, Room 10202 NEOB, Washington, D.C. 20503.

Agency: Federal Energy Regulatory Commission.

Title: Pilot Project for Electronic Filing of Documents.

OMB Number: 1902–new.

Frequency: Monthly.

Affected Public: Business or other for profit; State, Local or Tribal Governments.

Number of Respondents: 100.

Estimated Time Per Respondent: 20 minutes.

Total Burden Hours: 150.

Description: The challenges facing the Commission over the next few years are substantial, particularly in light of the changing and more competitive electric and gas industries. To ensure that the Commission's decisions are based on accurate, complete and timely information, an information technology initiative was developed to create a comprehensive information management system to minimize filing burdens, generate better information for use by industries and reduce the

processing times for Commission workload. The goal of this comprehensive information management system will be the development of a common, multipurpose, standards-based infrastructure that accepts electronic filings and maintains all Commission data in a data repository accessible electronically by Commission staff and eventually the public. Electronic filing pilots through the Commission's Web Site will assist in the development of standards, minimize the number of filing types and streamline filing requirements. When completed, electronic filing will substantially reduce the cost of paper, copying, postage, and messenger services for those who file at the Commission.

The initial pilot will allow the following categories of documents to be submitted electronically with the Commission in accordance with its regulations in 18 CFR Part 385:

- Motions to Intervene and Notices to Intervene § 385.214;
- Protests filed pursuant to §§ 385.208 and 385.211;
- Comments filed in rulemaking proceedings and in connection with Environmental Impact Statements;
- Comments on pleadings other than those set for hearing under Subpart E of the regulations and settlement comments;

- Answers to pleadings and rulemaking comments filed in accordance with § 385.213, other than those in proceedings set for hearing under Subpart E of the regulations;
- Withdrawals of comments in pleadings and rulemakings in accordance with § 385.206, other than those in proceedings set for hearing under Subpart E of the regulations;
- Amendments to such pleadings and rulemaking comments pursuant to § 385.215, other than those in proceedings set for hearing under Subpart E of the regulations;

These documents were selected for this pilot because of the lack of complexity in the information that is submitted to the Commission. During the pilot phase, participants will still be required to file paper copies in accordance with the Commission's current regulations in addition to filing the electronic submission.

Further impetus for expanding the use of electronic filing at the Commission is to ensure its compliance with the Paperwork Reduction Act of 1995 (PRA) (Pub. L. 104-13) and its commitment to the provisions of OMB's regulations at 5 CFR 1320 and corresponding guidance in OMB Circular A-130. The PRA calls

upon agencies to "promote the use of information technology by the Federal Government to improve productivity, efficiency, and effectiveness of Federal Programs, including through dissemination of public information and the reduction of information collection burdens on the public." (44 U.S.C. 3504(h)(5)). The goal is to have regulated entities file with the Commission fewer, and ultimately no, paper documents, as appropriate. The electronic submission also creates a transaction where documents can be accessed and retrieved faster and, as a result, the Commission response will be measurably faster.

The Commission is seeking emergency clearance for this pilot because the normal clearance procedures would disrupt the Commission's planned implementation of an electronic filing program and the Commission's strategic goal of reducing the regulatory burden on industries through the generation of better and more timely information for use by industries, minimizing the filing burden and reducing workload processing times for both industries and Commission staff.

Secretary.
