

Insert," both of which were revised and published in August 1992.

The draft guidance outlines recommended language for the prescribing information for the health care provider and the patient package inserts. Included are black box warnings explaining the increased risk of cancer of the uterus associated with the use of estrogens. Once finalized, the recommendations in this draft guidance should be followed for all approved, pending, and future applications.

In the **Federal Register** of October 15, 1998 (63 FR 55399), FDA announced the availability of an earlier version of this draft guidance. The agency received numerous comments. As a result, the original draft guidance was revised substantially and is being issued in draft for a second time.

This Level 1 draft guidance is being issued consistent with FDA's good guidance practices (62 FR 8961, February 27, 1997). It represents the agency's current thinking on estrogen class labeling. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirement of the applicable statute, regulations, or both.

Interested persons may submit written comments on the draft guidance to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The draft guidance and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: September 17, 1999.
