SUPPLEMENTARY INFORMATION:

I. Background

Executive Order (E.O.) 13096, signed on August 6, 1998 by President Clinton, recognizes the unique educational and culturally related academic needs of American Indian and Alaska Native students, and the Federal Government’s special, historic responsibility for the education of these students through its unique political and legal relationship with tribal governments. In recognition of the unique educational and culturally related academic needs of American Indian and Alaska Native students, improving educational achievement and academic progress for these students is vital to the national goal of preparing every student for responsible citizenship, continued learning, and productive employment. The Federal government is committed to improving

the academic performance and reducing the dropout rate of American Indian and Alaska Native students. To help fulfill this commitment in a manner consistent with tribal traditions and cultures, the Executive Order requires Federal agencies to focus special attention on six goals:

(1) Improving reading and mathematics;

(2) Increasing high school completion and postsecondary attendance rates;

(3) Reducing the influence of long-standing factors that impede educational performance, such as poverty and substance abuse;

(4) Creating strong, safe, and drug-free school environments;

(5) Improving science education; and

(6) Expanding the use of educational technology.

To accomplish these goals, Federal agencies are to develop a long-term comprehensive Federal Indian education policy that addresses the fragmentation of government services available to American Indian and Alaska Native students.

II. School Pilot Sites

E.O. 13096 requires the Departments of Education and the Interior to identify a reasonable number of schools funded by the Bureau of Indian Affairs (BIA) and public schools that can serve as models for schools with American Indian and Alaska Native students.

A special team of technical assistance providers, including Federal staff, must provide assistance to the model schools. Special attention must be given, where appropriate, to assistance in implementing comprehensive school reform demonstration programs that meet the criteria for those programs established by the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 1998 (Pub. L. 105–78), and to providing comprehensive service delivery that connects and uses diverse Federal agency resources.
