SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is correct.

The Occupational Safety and Health Act of 1970 (the Act) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents. (29 U.S.C. 657.) Paragraph 1910.132(d) of the PPE standard requires employers to perform a hazard assessment of the workplace to determine if personal protective equipment is necessary. The hazard assessment is an important part of the process to assure that the PPE selected is appropriate for the hazards present in the workplace. Paragraph (d)(2) requires employers to certify that they performed a hazard assessment. The signed certification must include the date of the hazard assessment and the identification of the workplace evaluated (area or location).

Paragraph (f)(4) of 1910.132 requires employers to certify that employees received and understood PPE training. The training certification must include the name of the employee(s) trained, the date of training, and the subject of the certification (*i.e.*, a statement identifying the document as a certification of training in the use of PPE).

The hazard assessment assures that the PPE selected is appropriate for the hazards present in the workplace. The certification record required with the

hazard assessment verifies that the employer conducted the hazard assessment. The training certification verifies that employees received the necessary training involving the use of PPE. OSHA compliance officers may require employers to disclose the certification records during an Agency inspection.

II. Proposed Actions

OSHA estimates that employers will expand 608,871 hours yearly to comply with the information collection requirements in the PPE Standard (29 CFR 1910.132). This is an increase of 151,656 burden hours over the previous estimate of 457,215 burden hours.

OSHA will summarize the comments submitted in response to this notice, and will include this summary in the request to OMB to extend the approval of the information collection requirements contained in the above standard.
