A Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP), 293° helicopter point in space approach, has been developed for Trinity West Hospital. Controlled airspace extending upward from 700 to 1200 feet above ground level (AGL) is needed to contain aircraft executing the approach. This action proposes to modify the existing controlled airspace for Steubenville, OH, to the northeast in order to include the point in space approach serving Trinity West Hospital.

The Proposal

the FAA is considering an amendment to 14 CFR part 71 to modify Class E airspace at Steubenville, OH, to accommodate aircraft executing the proposed GPS SIAP 293° helicopter point in space approach for Trinity West Hospital by modifying existing controlled airspace. Controlled airspace extending upward from 700 to 1200 feet AGL is needed to contain aircraft executing the approach. The area would be depicted on appropriate aeronautical charts. Class E airspace designations for airspace area extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999,

which is incorporated by reference in 14 CFR 71.1. The Class E airspace designated listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore this, proposed regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedure (44 FR 11034, February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Proposed Modification of Class E Airspace; Cooperstown, ND

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to modify Class E airspace at Cooperstown, ND. A review of the controlled airspace within the State of North Dakota has indicated a small portion of Class G uncontrolled airspace in the vicinity of Cooperstown, ND. Controlled airspace extending upward from 1200 feet above ground level (AGL) is needed to allow the FAA to provide safe and efficient air traffic control services for aircraft executing enroute and terminal instrument procedures into and out of Grand Forks International Airport. This small portion of uncontrolled airspace, in the southwest quadrant of Grand Forks Approach Control airspace, causes confusion for both pilots and controllers and does not allow for consistent application of instrument flight rules in a critical area servicing the Grand Forks International Airport. This action proposes to eliminate the Class G airspace approximately 15 nautical miles to the southeast of Cooperstown Airport.

DATES: Comments must be received on or before December 17, 1999.
