SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) (44 U.S.C. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION:

I. Background

Under 30 CFR 56.1000 and 57.1000, operators of metal and nonmetal mines must notify the Mine Safety and Health Administration (MSHA) when the operation of a mine will commence or when a mine is closed. Openings and closings of mines are dictated by the economic strength of the commodity mined, and by weather conditions which prevail at the mine site during various seasons.

MSHA must be aware of openings and closings so that its resources can be used efficiently in achieving the requirements of the Mine Act.

II. Current Actions

Section 103(a) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813, requires that each underground mine be inspected in its entirety at least four times a year, and each surface mine at least two times per year. Mines which operate only during warmer weather must be scheduled for inspection during the spring, summer and autumn seasons. Mines are sometimes located a great distance from MSHA field offices and the notification required by this standard precludes wasted time and trips.
