[Docket 55-99]

Foreign-Trade Zone 116—Port Arthur, TX; Expansion of Manufacturing Authority—Subzone 116B, Fina Oil and Chemical Company, Jefferson County, TX

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Foreign-Trade Zone of Southeast Texas, Inc., grantee of FTZ 116, requesting authority on behalf of the Fina Oil and Chemical Company (Fina), to expand the scope of manufacturing activity conducted under zone procedures within Subzone 116B at the Fina oil refinery complex in Jefferson County, Texas. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on November 8, 1999.

Subzone 116B was approved by the Board in 1995 and consists of four sites with 450 employees in Jefferson County, Texas: *Site 1* (1,244 acres)—main refinery complex located along the Neches River at State Farm to Market Highway 366 & 32nd Street, Port Arthur (Jefferson County); *Site 2* (19 acres)—West Port Arthur Tank Farm (564,000 barrel capacity), owned by American Petrofina Pipe Line Company (subsidiary of Fina, Inc.), located at Roosevelt and 53rd Streets, Port Arthur; *Site 3* (194 acres)—refinery expansion site, located adjacent to the refinery at State Farm to Market Hwy 366, Port

Arthur; *Site 4*—Sun Marine Terminal-Nederland tank storage facility, leased storage (1,278,500 barrel capacity), along the Neches River in Nederland, Texas. Authority was granted for the manufacture of fuel products and certain petrochemical feedstocks and refinery by-products (Board Order 772, 60 FR 49564, 9/26/95).

The refinery (180,000 barrels per day; 450 employees) is used to produce fuels and petrochemical feedstocks. The expansion request involves a new petrochemical unit. Fina, in a limited partnership with BASF Corporation will construct a single-train naphtha cracker facility on 51 acres of Site 1. The new facilities (with 150 additional employees) will produce ethylene (1.9 billion lbs./year), propylene (1.2 billion lbs./year), as well as butadiene, styrene, benzene, toluene and xylene (HTS 2901, duty free). In addition, the expansion will increase storage capacity by 1.5 million barrels, and increase the overall crude and condensate capacity of the refinery to 240,000 BPD. New feedstocks for use in the expanded facilities will include natural gas condensate, and virgin gas oil (HTS 2710.00.45, 2710.00.05, and 2710.00.10, duty rate ranges from 5.25 cents/barrel to 10.5 cents/barrel). Approximately 75 percent of the crude oil and 85 percent of the condensates will be sourced from abroad.

Zone procedures would exempt the new refinery facility from Customs duty payments on the foreign products used in its exports. On domestic sales, the company would be able to choose the Customs duty rates for certain petrochemical feedstocks (duty-free) by admitting foreign crude oil and natural gas condensate in non-privileged foreign status. The application indicates that the additional savings from zone procedures would help improve the refinery's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ staff has been appointed examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is January 21, 2000. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period February 7, 2000.

A copy of the application and the accompanying exhibits will be available for public inspection at each of the following locations:
