Statutory authority for this collection is contained in 47 U.S.C. 154(I) and 309(j), as amended. The adjustment to FCC Form 600 is a supplemental showing to demonstrate why more than ten trunked channels are required. This form will eventually be replaced by FCC Form 601 upon conversion of all radio service to the Universal Licensing System (ULS) which currently uses FCC Form 600. The Commission uses the information contained in this form to determine whether the applicant is legally, technically, and financially qualified to be licensed. Without such information the Commission could not determine whether to issue the licenses to the applicants that provided telecommunications services to the public, and therefore, fulfill its statutory responsibilities in accordance with the Communications Act of 1934, as amended. The information will also be used to update the database and provide for proper use of the frequency spectrum.

*OMB Control Number:* 3060-0690.

*Title:* Rules Regarding the 37.0-38.6 GHz and 38.6-40.0 GHz Bands.

*Form Number(s):* 415/415T.

The rules implemented the use of a channeling plan, and licensing and technical rules for fixed point-to-point microwave operations in the 37 GHz band, while also modifying the rules for the 39 GHz band to make them consistent with the technical rules we

are proposing for the 37 GHz band. The action is authorized by Sections 4(i), 303(c), 303(f), 303(g), 303(r), and 309(j) of the Communications Act of 1934. Two rules in the Memorandum Opinion and Order, § 101.17—Performance Requirements for the 38.6–40.0 GHz frequency band, and § 101.103—Frequency coordination, impose information burdens. The FCC uses this information to provide adequate point-to-point microwave spectrum, which will facilitate provision of the communications infrastructure for commercial and private mobile radio operations and competitive wireless local telephone service.

*OMB Control Number:* 3060–0882.

The information is used by the Commission to assess compliance with 218–219 MHz service construction requirements, and to provide adequate spectrum for the service. This will facilitate spectrum efficiency and competition by the 218–219 MHz service licensees in the wireless marketplace.
