On December 21, 1996, the HFBR was shut down for refueling and maintenance. Before the reactor returned to scheduled scientific operations, monitoring indicated that a plume of tritiated water was contaminating the groundwater in excess of drinking water standards south and down gradient of the reactor, within the site boundary. Data collection and analysis identified the HFBR spent fuel pool as the likely source of the tritium plume. Cleanup of this contamination has been incorporated into the site's overall cleanup program. All fuel was removed from the reactor and the pool and shipped off-site. The pool was drained and decontaminated to eliminate the source of the tritium to the groundwater beneath the HFBR.

After analysis of the time and expense to restart the HFBR, the Department has decided to permanently close the HFBR. This decision is categorically excluded under DOE's NEPA regulations. Therefore, preparation of the draft EIS has been stopped. Additional NEPA review will be necessary in the future for a proposal to decontaminate and decommission the reactor.

Issued in Washington, DC, this 23rd day of November, 1999.

Associate Director of the Office of Science for the Office of Basic Energy Sciences.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-6482-1]

Review of Environmental Protection Agency Public Participation Policies

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; request for public comment.

SUMMARY: The EPA Administrator, in EPA Report 100-R-99-006, dated July 1999, entitled "Aiming for Excellence—Actions to Encourage Stewardship and Accelerate Environmental Progress, Report of the EPA Innovations Task Force," pledges the Agency to, "Evaluate and update EPA's public participation requirements. We will assess how well our regulations and

policies ensure public participation in decision making. We will report on what we find and develop an action plan to upgrade requirements and fill gaps." EPA has convened an internal workgroup to conduct a review of EPA public participation regulations and policies in accordance with this pledge.

The workgroup is scheduled to give a report to the Administrator by January 31, 2000, which will contain an inventory of EPA regulations and policies regarding public participation and an initial assessment of how well these regulations and policies ensure public participation in decision making. The report will also contain an action plan to update requirements and fill gaps.

One of the primary policies being reviewed is the Final EPA Policy on Public Participation (**Federal Register**/ Vol. 46/no. 12/Monday, January 19, 1981), herein referred to as the 1981 Policy. The statements in the 1981 Policy have been the basis for many of EPA's public participation requirements in the nineteen years since its initial publication.

The workgroup is seeking public comment on two issues at this time:

1. What changes need to be made to the 1981 Policy on Public Participation?
(1a) What is working well, and how does the experience of the past nineteen years suggest the need for improvements in the general procedures for involving the public in EPA programs and decisions?

2. How can we further engage the public in the effort to revise the 1981 Policy and other EPA regulations and policies which may need to be updated in regard to public participation?

(2a) What are the suggested elements of a strategy to further engage the public in updating requirements and filling gaps in EPA's regulations and policies concerning public participation?

Comments received within the 30-day period designated in this notice will be taken under consideration as the workgroup writes the initial report to the Administrator in January 2000. Comments received after the 30-day period will be reviewed as the Agency further develops and implements an action plan to update the 1981 policy and, as necessary, other regulations and policies.

DATES: Comments must be submitted on or before December 30, 1999.
