Grand River Dam Authority; Notice of Availability of Final Environmental Assessment

December 7, 1999.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR Part 380 (Order No. 486, 52 F.R. 47910), the Office of Hydropower Licensing has prepared a final environmental assessment (FEA) for Grand River Dam Authority's proposal to permit Dennis Blakemore, d/b/a Honey Creek Landing, to modify an existing commercial marina facility located on Grand Lake's Honey Creek adjacent to the Honey Creek Bridge (US Highway 59). The proposed modifications include, but are not limited to, the relocation of a fuel dock from its approved location, about 845 feet from the northern shoreline to a new (present) location, about 130 feet from the northern shoreline. Further, the permittee proposed to replace four existing boat slips with a building containing a business office, bathhouse, and laundromat. The Pensacola Project is on the Grand River, in Craig, Delaware, Mayes, and Ottawa Counties, Oklahoma.

The FEA is attached to a Commission order issued on November 15, 1999 for the above application. Copies of the FEA can be obtained by calling the Commission's Public Reference Room at (202) 208-1371. It may also be viewed on the web at <http://www.ferc.fed.us/online/rims.htm> (please call (202) 208-2222 for assistance). In the FEA, staff concludes that approval of the licensee's proposal, as well as various alternative actions, would not constitute a major Federal action significantly affecting the quality of the human environment. For further information, please contact the project manager, Jon Cofrancesco at (202) 219-0079.
