National Highway Traffic Safety Administration

[Docket No. NHTSA-99-6601]

Notice of Receipt of Petition for Decision That Nonconforming 1990-1991 Toyota MR2 Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition for decision that nonconforming 1990-1991 Toyota MR2 Passenger cars are eligible for importation.

SUMMARY: This notice announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that 1990-1991 Toyota MR2 passenger cars that were not originally manufactured to comply with all applicable Federal motor vehicle safety standards are eligible for importation into the United States because (1) they are substantially similar to vehicles that were originally manufactured for importation into and sale in the United States and that were certified by their manufacturer as complying with the safety standards, and (2) they are capable of being readily altered to conform to the standards.

DATES: The closing date for comments on the petition is January 12, 2000.

ADDRESSES: Comments should refer to the docket number and notice number, and be submitted to: Docket Management, Room PL-401, 400 Seventh St., SW, Washington, DC 20590. (Docket hours are from 9 am to 5 pm)

FOR FURTHER INFORMATION CONTACT: George Entwistle, Office of Vehicle Safety Compliance, NHTSA (202-366-5306).

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable Federal motor vehicle safety standards.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

G&K Automotive Conversion, Inc. of Santa Ana, California (G&K) (Registered Importer 90-007) has petitioned NHTSA to decide whether 1990-1991 Toyota MR2 passenger cars are eligible for importation into the United States. The vehicles which G&K believes are substantially similar are 1990-1991 Toyota MR2 passenger cars that were manufactured for importation into, and sale in, the United States and certified by their manufacturer, Toyota Motor Corporation, as conforming to all applicable Federal motor vehicle safety standards.

The petitioner claims that it carefully compared non-U.S. certified 1990-1991 Toyota MR2 passenger cars to their U.S. certified counterparts, and found the vehicles to be substantially similar with respect to compliance with most Federal motor vehicle safety standards.

G&K submitted information with its petition intended to demonstrate that non-U.S. certified 1990-1991 Toyota MR2 4-Door passenger cars, as originally manufactured, conform to many Federal motor vehicle safety standards in the same manner as their U.S. certified counterparts, or are capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that non-U.S. certified 1990-1991 Toyota MR2 passenger cars are identical to their

U.S. certified counterparts with respect to compliance with Standard Nos. 102 *Transmission Shift Lever Sequence*, 103 *Defrosting and Defogging Systems*, 104 *Windshield Wiping and Washing Systems*, 105 *Hydraulic Brake Systems*, 106 *Brake Hoses*, 113 *Hood Latch Systems*, 116 *Brake Fluid*, 118 *Power Window Systems*, 124 *Accelerator Control Systems*, 201 *Occupant Protection in Interior Impact*, 202 *Head Restraints*, 204 *Steering Control Rearward Displacement*, 205 *Glazing Materials*, 206 *Door Locks and Door Retention Components*, 207 *Seating Systems*, 209 *Seat Belt Assemblies*, 210 *Seat Belt Assembly Anchorages*, 212 *Windshield Retention*, 216 *Roof Crush Resistance*, 219 *Windshield Zone Intrusion*, and 302 *Flammability of Interior Materials*.

Additionally, the petitioner states that non-U.S. certified 1990-1991 Toyota MR2 passenger cars comply with the Bumper Standard found in 49 CFR part 581.

Petitioner also contends that the vehicles are capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays*: (a) Installation of a seat belt warning lamp that displays the required seat belt symbol; (b) recalibration of the speedometer/odometer from kilometers to miles per hour.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment*: (a) Installation of U.S.-model headlamp assemblies; (b) installation of U.S.-model front sidemarkers; (c) installation of U.S.-model taillamp assemblies; (d) installation of a high mounted stop lamp on vehicles that are not already so equipped.

Standard No. 110 *Tire Selection and Rims*: Installation of a tire information placard.

Standard No. 111 *Rearview Mirror*: Replacement of the passenger side rearview mirror with a U.S.-model component.

Standard No. 114 *Theft Protection*: Installation of a warning buzzer microswitch in the steering lock assembly and a warning buzzer.

Standard No. 208 *Occupant Crash Protection*: (a) Installation of a seat belt warning buzzer; (b) installation of a driver's side air bag and knee bolster, identical to those installed on the vehicle's U.S. certified counterpart. The petitioner states that the vehicles are equipped with Type II seat belts in the front outboard designated seating positions, which are the only seating positions in the vehicle.

Standard No. 214 *Side Impact Protection*: Installation of U.S.-model

door beams on vehicles that are not already so equipped.

Standard No. 301 Fuel System

Integrity: Installation of a rollover valve in the fuel tank vent line between the fuel tank and the evaporative emissions collection canister.

The petitioner states that prior to importation, the vehicle's vehicle identification number (VIN) will be inscribed on 14 major vehicle parts and a theft prevention certification label will be affixed to the vehicle to comply with the Theft Prevention Standard found in 49 CFR part 541.

The petitioner also states that a VIN plate must be affixed to the vehicle so that it can be read from the left windshield pillar, and a VIN reference label must be affixed to the edge of the door or to the latch post nearest the driver, to meet the requirements of 49 CFR part 565.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW, Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A) and (b)(1); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: December 8, 1999.

Office of Motor Carrier Safety

[OMCS Docket No. 99-5473 (formerly FHWA Docket No. 99-5473)]

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Office of Motor Carrier Safety (OMCS), DOT.

ACTION: Notice of final disposition.

SUMMARY: The OMCS announces its decision to exempt James F. Durham from the vision requirement in 49 CFR 391.41(b)(10).

DATES: December 13, 1999.

FOR FURTHER INFORMATION CONTACT: For information about the vision exemptions in this notice, Ms. Sandra Zywockarte, Office of Motor Carrier Safety, (202) 366-2987; for information about legal issues related to this notice, Ms. Judith Rutledge, Office of the Chief Counsel, (202) 366-0834, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Electronic Access

Internet users may access all comments received by the U.S. DOT Dockets, Room PL-401, by using the universal resource locator (URL): <http://dms.dot.gov>. It is available 24 hours each day, 365 days each year. Please follow the instructions online for more information and help.

Internet users may reach the Office of the Federal Register's home page at: <http://www.nara.gov/fedreg> and the Government Printing Office's database at: <http://www.access.gpo.gov/nara>.

Background

On May 18, 1999, the FHWA published notice of its preliminary determination to grant Mr. Durham an exemption from the vision standard applicable to drivers of commercial motor vehicles (CMVs) in interstate commerce (64 FR 27025). We refer readers to that notice for the history of his application. Two public comments were received and have been considered in our final decision to grant Mr. Duncan an exemption. On October 9, 1999, the Secretary of Transportation transferred the motor carrier safety functions performed by the FHWA to the Office of Motor Carrier Safety, a new office created in the Department of Transportation. This transfer was performed pursuant to section 338 of the Department of Transportation and Related Agencies Appropriations Act, FY 2000, Public Law 106-69, 113 Stat. 986, as amended by Public Law 106-73, 113 Stat. 1046. As a result of the transfer of functions, the OMCS now

administers the driver qualification standards in 49 CFR part 391 and processes requests for exemptions from the vision standard under 49 U.S.C. 31315 and 31136(e). Accordingly, an OMCS docket number has been assigned to this proceeding.

Mr. Durham's Vision and Driving Experience

The vision requirement in 49 CFR 391.41(b)(10) provides:

A person is physically qualified to drive a commercial motor vehicle if that person has distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or visual acuity separately corrected to 20/40 (Snellen) or better with corrective lenses, distant binocular acuity of at least 20/40 (Snellen) in both eyes with or without corrective lenses, field of vision of at least 70° in the horizontal meridian in each eye, and the ability to recognize the colors of traffic signals and devices showing standard red, green, and amber.

Since 1992, we have undertaken studies to determine if this vision standard should be amended. The latest report from our medical panel recommends changing the field of vision standard from 70° to 120°, while leaving the visual acuity standard unchanged. (See Frank C. Berson, M.D., Mark C. Kuperwaser, M.D., Lloyd Paul Aiello, M.D., and James W. Rosenberg, M.D., "Visual Requirements and Commercial Drivers," October 16, 1998, filed in Docket FHWA-98-4334). The panel's conclusion supports the OMCS's view that the present standard is reasonable and necessary as a general standard to ensure highway safety. The OMCS also recognizes that some drivers do not meet the vision standard but have adapted their driving to accommodate their vision limitation and demonstrated their ability to drive safely.

Mr. Durham falls into this category. He suffered a penetrating trauma to his right eye in 1992 that caused aphakia and corneal and retinal scarring. As a result, vision in his right eye has been reduced to finger counting. Uncorrected vision in his left eye falls well within the regulation's standard, however, and his doctor has stated that Mr. Durham is capable of performing tasks related to driving a CMV.

Mr. Durham's driving record supports the doctor's opinion. He drove a CMV for 4 years with his limited vision (1992 to April 1996) until his employer disqualified him for failing to meet the vision qualification standard. Following an 18-month break, he resumed driving part-time from October 1997 until July 1998, giving him about 5 years of experience driving with his vision
