

Reason for Action

This rulemaking is being initiated to adopt certain licensing and service rules for the 24 GHz band, to auction 24 GHz spectrum not used by Digital Electronic Message Service (DEMS) licensees relocated from the 18.82–18.92 and 19.16–19.26 GHz bands (18 GHz band) to the 24.25–24.45 and 25.05–25.25 GHz bands (24 GHz band).

Objectives

The Commission's objectives are: (1) to accommodate the introduction of new uses of spectrum and the enhancement of existing uses; and (2) to facilitate the awarding of licenses to entities who value them the most.

Legal Basis for Proposed Rules

The proposed action is authorized under the Administrative Procedure Act, 5 U.S.C. 553; and sections 1, 4(i), 7, 301, 303, 308 and 309(j) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 157, 301, 303, 308 and 309(j).

Description and Estimate of Small Entities Subject to the Rules

The rules will affect incumbent licensees who are relocated to the 24 GHz band from the 18 GHz band and applicants who wish to provide services in the 24 GHz band.

The Commission has not developed a definition of small entities applicable to licensees in the 24 GHz band. Therefore, the applicable definition of small entity is the definition under the Small Business Administration (SBA) rules for the radiotelephone industry that provides that a small entity is a radiotelephone company employing fewer than 1,500 persons. The 1992 Census of Transportation, Communications, and Utilities, conducted by the Bureau of the Census, which is the most recent information available, shows that only 12 radiotelephone firms out of a total of 1,178 such firms that operated during 1992 had 1,000 or more employees. The Commission believes that there are only two licensees in the 24 GHz band that will be relocated, Teligent and TRW, Inc. It is the Commission's understanding that Teligent and its related companies have less than 1,500 employees, although this may change in the future. On the other hand, TRW is not a small entity. The Commission therefore believes that only one licensee in the 24 GHz is a small business entity. The Commission seeks comment on this analysis. In providing such comment, commenters are requested to provide information regarding how many total

and small business entities would be relocated.

The proposals also affect potential new licensees on the 24 GHz band. Pursuant to 47 CFR 24.720(b), the Commission has defined "small entity" for Blocks C and F broadband PCS licensees as firms that had average gross revenues of less than \$40 million in the three previous calendar years. This regulation defining "small entity" in the context of broadband PCS auctions has been approved by the SBA. With respect to new applicants in the 24 GHz band, the Commission also proposes to use the small entity definition adopted in the Broadband PCS proceeding. With regard to "very small businesses" the Commission proposes to adopt the definition used for 39 GHz licenses and for the PCS C and F block licenses: businesses with average annual gross revenues for the three preceding years not in excess of \$15 million.

The Commission will not know how many licensees will be small or very small businesses until the auction, if required, is held. Even after that, the Commission will not know how many licensees will partition their license areas or disaggregate their spectrum blocks, if partitioning and disaggregation are allowed. In view of our lack of knowledge of the entities that will seek 24 GHz licenses, the Commission therefore assumes that, for purposes of its evaluations and conclusions in the Initial Regulatory Flexibility Analysis, all of the prospective licensees are either small or very small business entities.

The Commission invites comment on this analysis.

Reporting, Recordkeeping, and Other Compliance Requirements

Applicants for 24 GHz licenses will be required to submit applications. The Commission requests comment on how these requirements can be modified to reduce the burden on small entities and still meet the objectives of the proceeding.

Significant Alternatives Minimizing the Impact on Small Entities Consistent With Stated Objectives

The Commission has reduced burdens wherever possible. To minimize any negative impact, however, it proposes certain incentives for small and very small entities that will redound to their benefit. These special provisions include partitioning and spectrum disaggregation. The regulatory burdens the Commission has retained, such as filing applications on appropriate forms, are necessary in order to ensure that the public receives the benefits of

innovative new services in a prompt and efficient manner. The Commission will continue to examine alternatives in the future with the objectives of eliminating unnecessary regulations and minimizing any significant economic impact on small entities. The Commission seeks comment on significant alternatives commenters believes it should adopt.
