DEPARTMENT OF THE INTERIOR

Final Cooperative Management Plan/ Environmental Impact Statement, Vancouver National Historic Reserve, Washington

AGENCY: National Park Service, DOI.

ACTION: Notice of availability of final environmental impact statement.

SUMMARY: The final Cooperative Management Plan/Environmental Impact Statement (CMP/EIS) is a description of a vision, shared by four public agencies and their partners, for the coordinated management of the Vancouver National Historic Reserve. The plan analyzes three possible alternatives for future management and recommends a proposed action. The proposed action can be summarized in three broad goals: Preservation of historic structures, physical assets, and cultural landscapes, Education and interpretation of the significance and history of the area, and Public Use of and accessibility to the Historic Reserve. These overlapping goals will be reached through public and private involvement and funding to ensure economic balance and sustainability for all new endeavors.

The CMP/EIS is composed of three parts: the revised abstract/cover sheet, revisions to the plan, and comments and responses on the draft CMP/EIS. The revised abstract outlines the status of the document, briefly describes the alternatives, and lists the responsible agencies and contact persons. The "Revisions" section shows changes made in the draft document. The most significant changes are (1) a revision of the "U.S. Army Reserve" paragraph in the "Issues beyond the Scope of this Planning Process" section, (2) the rewording of three primary interpretive themes, and (3) the incorporation of more recent development cost information in alternative A.

This document is presented in an abbreviated format. It must be integrated with a copy of the draft CMP/EIS issued in July 1999 to be considered a complete document reflecting the full proposal, alternatives, and all significant environmental impacts. The abbreviated format has been used because the changes to the draft document were minor and confined primarily to factual corrections.

Approximately 350 copies of the draft CMP/EIS were distributed to the public. It was also available on the Internet, at local libraries, and at the office of the Reserve Partners. Four public meetings were held. The review and comment period began on July 23, 1999, and ended September 21, 1999. All comments received were reviewed and considered by the NPS in the preparation of the final CMP/EIS.

SUPPLEMENTARY INFORMATION: The no-action period on this final CMP/EIS will expire 30 days after the Environmental Protection Agency has accepted the

document and published a notice of availability in the **Federal Register**. Following the no-action period, a record of decision to implement the proposed action will be signed by the National Park Service. The Vancouver National Historic Reserve Partners will then distribute a final Comprehensive Management Plan that integrates all of the changes to the document based on public review and comment but will not include alternatives B and C or the "Environmental Consequences" section.

All who submitted substantive comments on the draft CMP/EIS will receive a copy of the final. Public reading copies of the final CMP/EIS will be available for review at the following locations: Office of Public Affairs, National Park Service, 1849 C St., NW, Washington, DC 20240; Fort Vancouver National Historic Site, 612 E. Reserve Street, Vancouver, WA 98661-3811; General O.O. Howard House, 750 Anderson Street, Vancouver, WA 98661; Vancouver Barracks Headquarters, 638 Hathaway Road, Vancouver, WA 98433-9500; and Washington State Office of Archaeology and Historic Preservation, 420 Golf Club Road SE, Suite 201, Lacey, WA 98503. For further information, contact Superintendent, Fort Vancouver National Historic Site, (360) 696-7655, ext. 13, or Historic Reserve Manager for the City of Vancouver, (360) 992-1832.

Dated: November 29, 1999.

Rory D. Westberg,

Superintendent, Columbia Cascades Support Office, Pacific West Region.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Bay-Delta Advisory Council's Ecosystem Roundtable Issues Subcommittee Meeting

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of meeting.

SUMMARY: The Bay-Delta Advisory Council's (BDAC) Ecosystem Roundtable Issues Subcommittee will meet on January 10, 1999 to discuss the long-term water acquisition framework and revisions to next year's proposal solicitation package. This meeting is open to the public. Interested persons may make oral statements to the Ecosystem Roundtable or may file written statements for consideration.

DATES: The BDAC's Ecosystem Roundtable meeting will be held from 9:30 a.m. to 12 p.m. on Monday, January 10, 2000.

ADDRESSES: The Ecosystem Roundtable will meet at the Resources Building, Room 1118, 1416 Ninth Street, Sacramento, CA 95814.

FOR FURTHER INFORMATION CONTACT: Wendy Halverson Martin, CALFED Bay-Delta Program, at (916) 657–2666. If reasonable accommodation is needed due to a disability, please contact the Equal Employment Opportunity Office at (916) 653–6952 or TDD (916) 653–6934 at least one week prior to the meeting.

SUPPLEMENTARY INFORMATION: The San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Bay-Delta system) is a critically important part of California's natural environment and economy. In recognition of the serious problems facing the region and the complex resource management decisions that must be made, the state of California and the Federal government are working together to stabilize, protect, restore, and enhance the Bay-Delta system. The State and Federal agencies with management and regulatory responsibilities in the Bay-Delta system are working together as CALFED to provide policy direction and oversight for the process.

One area of Bay-Delta management includes the establishment of a joint State-Federal process to develop long-term solutions to problems in the Bay-Delta system related to fish and wildlife, water supply reliability, natural disasters, and water quality. The intent is to develop a comprehensive and balanced plan which addresses all of the resource problems. This effort, the CALFED Bay-Delta Program (Program),
