

past safety recommendations, and provided quick feedback to the fishing industry by recommending measures believed to have the greatest potential for reducing loss of life and property. The Task Force completed a report containing safety recommendations in March 1999 and presented the report to the Commercial Fishing Industry Vessel Advisory Committee (CFIVAC) and Coast Guard District Fishing Vessel Safety Coordinators. The Task Force report is available at <http://www.get.to/thefishingreport> or at Commandant (G-MOA), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, 202-267-1430. The Coast Guard consolidated the Task Force recommendations commonly supported by both the CFIVAC and the District Fishing Vessel Safety Coordinators and subsequently developed the CFVSAP. The CFVSAP was presented at the October 4-5, 1999 meeting of the CFIVAC. The CFIVAC agreed with the concepts presented in the CFVSAP. Also, the CFIVAC agreed with the Coast Guard that holding regional listening sessions would result in valuable input from a larger segment of the fishing industry. By publication of this notice, the Coast Guard is seeking further feedback from fisherman on the CFVSAP. The CFVSAP is available at <http://www.uscg.mil/hq/g-m/advisory/cfivac/fishexpo99.pdf> or at Commandant (G-MOC), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, 202-267-2008.

Objective and Issues

The objective of the regional listening sessions and the request for comments is to receive information from the general public and the fishing industry pertaining to the CFVSAP and other possible safety issues affecting the fishing industry. The Coast Guard wishes to identify ways to improve safety in the fishing industry.

The Coast Guard is specifically interested in information pertaining to the following:

- The most critical safety issues in your region.
- Ways the Coast Guard might better communicate with the fishing industry.
- Ways the Coast Guard might assist in improving safety in the fishing industry.
- Ways the fishing industry might improve its safety record without Coast Guard or other government involvement.
- The minimum level of training that should be considered in a training based certificate program.

- The most safety beneficial composition of a vessel examination program.

- Whether the Territorial Sea Baseline is the best reference parameter for setting certain safety equipment carriage requirements.

Format of Regional Listening Sessions

Each listening session will be preceded with a presentation by the Coast Guard on the CFVSAP. After the presentation the audience will have an opportunity to comment on the specifics of the CFVSAP. The Coast Guard will then present a list of standardized issues similar to those contained in Objectives and Issues and then open the listening session to general comments from the audience.

Federal Highway Administration

Environmental Impact Statement; Waukesha and Washington Counties, Wisconsin

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway improvement of State Trunk Highway 164 (STH 164) corridor between Interstate Highway 94 (IH-94) in Waukesha County and the vicinity of State Trunk Highway 175 (STH 175) in Washington County, Wisconsin.

Background

The FHWA, in cooperation with the Wisconsin Department of Transportation, will prepare a Draft Environmental Impact Statement (EIS) on a proposal to improve STH 164 as an ultimate four lane roadway between IH 94 in Waukesha County and the vicinity of STH 175 in Washington County, a distance of about 32 kilometers (20 miles).

The proposal is being considered to address existing and future transportation demand on STH 164, and to preserve land for future transportation improvements. Planning, environmental and engineering studies are underway to develop transportation alternatives. The EIS will assess the environmental impacts of alternatives including: (1) No build, (2) reconstructing the existing 2-land highway to a 4-land facility, and (3) possible alignment deviation from the present alignment at some locations to minimize environmental impacts.

Information describing the proposed action and soliciting comments will be sent to appropriate Federal, State and local agencies and to private organizations and citizens who have previously expressed, or are known to have interest in this proposal. A project advisory committee comprised of Federal and State agencies, local officials, environmental, and other community interests is being established to provide input during development and refinement of alternatives and corridor preservation activities. A series of public meetings will be held to solicit comments from
