(f) EPA expects to support the establishment of moveable monitoring platforms to better assess the multiple program objectives and characterize areas which are disproportionately impacted by HAPs. We would appreciate the Subcommittee thoughts on how best to make use of these data.

(g) In addition to your comments on the overall strategy, we seek your advice regarding the utility of these data analysis approaches to evaluate dispersion model estimates and with the appropriateness of this collection of monitoring methods as a logical starting point to measure a list of urban HAPs.
