

1998. The applicant must also attest that they intended to continue working as a crewmember in the Dungeness crab commercial fishery in 1999. (3) A sworn and notarized affidavit, from each of the qualifying fishermen they worked for during the interim qualifying period, 1996–1998, attesting to the applicant's participation in each of those interim qualifying years as a crewmember in the commercial Dungeness crab fishery within either Beardslee Island or Dundas Bay wilderness areas. (4) Documentation from the Alaska Department of Fish and Game detailing the applicant's history as a state licensed commercial fisheries crewmember. (5) Copy of IRS Form 1099–MISC documenting income as a crewmember for qualifying Dungeness crab commercial fishermen for each year worked during the 1996–1998 interim qualifying period. Where crewmember income from other fisheries is included in the IRS Form 1099–MISC this must be noted and the amount attributable only to the Dungeness crab fishery specified. (5) Any other available corroborating information that can assist in a determination of eligibility for interim compensation. The superintendent will make a written determination on eligibility for compensation based on the documentation provided by the applicant. The superintendent will also make a written determination on the amount of 1999 interim compensation to be paid to an eligible applicant. The amount of interim compensation will be based on the applicant's average annual pre-tax income as a crewmember in the Dungeness crab commercial fishery during the 3-year interim qualifying period, 1996–1998, not to exceed \$10,000. NPS intends to complete payment of interim compensation to a crewmember meeting the above eligibility criteria within 45 days of receipt of a complete application. If an application for interim compensation is denied the superintendent will provide the applicant the reasons for the denial in writing. Any applicant adversely affected by the superintendent's determination may appeal to the regional director, Alaska region, within 60 days. Applicants must substantiate the basis of their disagreement with the superintendent's determination. The regional director will provide an opportunity for an informal oral hearing, either in Anchorage or by teleconference. After consideration of written materials and oral hearing, if any, and within a reasonable time, the regional director will affirm, reverse, or modify the superintendent's

determination and set forth in writing the basis for the decision. A copy of the decision will be forwarded promptly to the applicant and will constitute final agency action. Denial or receipt of interim compensation as a Dungeness crab fishery crewmember will not affect an applicant's consideration for future compensation as a crewmember as part of a final compensation plan established under the Act, as amended.

Dated: March 6, 2000.

**Robert D. Barbee,**

## DEPARTMENT OF THE INTERIOR

### Bureau of Reclamation

#### **Bostwick Division, Frenchman-Cambridge Division, and Kanaska Division, Almena Unit INT–DEIS–99–39**

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice to reopen comment period for draft environmental impact statement (DEIS) and announce schedule for public workshop and public meeting.

**SUMMARY:** Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior, Bureau of Reclamation (Reclamation), prepared a DEIS for the renewal of long-term water supply contracts for continued delivery of irrigation water from Federal projects in the Republican River basin in Nebraska and Kansas. The DEIS described five alternatives, including no action and a preferred alternative, and evaluated the environmental consequences of renewing the long-term water supply contracts and of modifications to reservoir operations. Public hearings were held in Nebraska and Kansas to receive public comment on the DEIS.

The Corps of Engineers (Corps), along with other Federal, State, and local entities, is a cooperating agency in the water supply contract renewal process. Harlan County Lake in Nebraska is owned by the United States and managed by the Corps. Following completion of the initial 60-day public review and comment period, Reclamation and the Corps continued to receive public comment concerning alternative operations at Harlan County Lake. The magnitude of these comments prompted Reclamation and the Corps to allow additional time for all interested

parties to provide comments on the water supply contract renewal process.

**DATES:** A 30-day public review and comment period commences with the publication of this notice. Written comments on the DEIS or the Corps' technical report should be submitted by April 21, 2000.

Written comments from interested parties unable to attend the hearing, those not wanting to make oral presentations, or those wishing to supplement their oral presentations at the public hearing should be transmitted to the Nebraska-Kansas Area Office by April 21, 2000, for inclusion in the public record.

A joint Reclamation/Corps public meeting has been scheduled to begin at 7 p.m. on April 12, 2000. An informal public workshop has also been scheduled from 10 a.m. to 4 p.m.

**ADDRESSES:** The meeting and workshop will be held at the Johnson Community Center, 509 Main Street, in Alma, Nebraska.

Written comments on Reclamation's DEIS should be submitted to the Area Manager (Attention: Judy O'Sullivan), Nebraska-Kansas Area Office, P.O. Box 1607, Grand Island NE 68802. Written comments on the Corps' technical report should be submitted to District Engineer, U.S. Army Corps of Engineers, Kansas City District, 700 Federal Building, 601 East Twelfth Street, Kansas City MO 64106–2896.

You may request a Summary of the DEIS, the entire DEIS (with appendices) in printed copy or on computer disk, or the Corps' technical report. Copies may be obtained from the above address or by telephone (308) 389–4622 x211. The DEIS and technical report is available for public inspection and review on Reclamation's Internet site at "www.gp.usbr.gov" in the "Current Activities" section under "Environmental Activities." In addition, the technical report can be viewed at the two Corps' Internet sites "www.nwk.usace.army.mil" and "www.nwk.usace.army.mil/haco/harlan\_home.htm"

See Supplementary Information section for additional addresses where the DEIS and/or technical report are available for public inspection and review.

**FOR FURTHER INFORMATION CONTACT:** Jill Manring, Basin Study Coordinator, Nebraska-Kansas Area Office, P.O. Box 1607, Grand Island NE 68802—telephone (308) 389–4622 x214; or Maria Chastain-Brand, Project Manager-Harlan County Lake Study, U.S. Army Corps of Engineers, Kansas City District, 700 Federal Building, 601 East Twelfth

Street, Kansas City MO 64106-2896—telephone (816) 983-3107.

#### SUPPLEMENTARY INFORMATION:

Reclamation has revised the preferred alternative by modifying minimum reservoir surface elevations at Reclamation reservoirs and by implementing an agreement with the Corps on the operation of Harlan County Lake. A description of the revised preferred alternative is being distributed in the Republican River Roundup newsletter. Reclamation will not prepare a revised DEIS because the impacts associated with the modified minimum reservoir surface elevations on Reclamation reservoirs and the Harlan County Lake agreement fall within the range of those evaluated in the No Action Alternative and Reclamation's Preferred Alternative in the DEIS.

The Corps has developed a technical report addressing the potential impacts of the revised preferred alternative on Harlan County Lake. The Corps' technical report is being distributed to the contract renewal mailing list on March 22, 2000, and will be incorporated into Reclamation's Final EIS. The Corps, as a cooperating agency, will consider comments on the effects of the preferred alternative on Harlan County Lake. In addition, the Corps will prepare a separate Record of Decision (ROD) concerning the relationship of the preferred alternative to the Corps' Harlan County Lake water control manual. Both Reclamation's revised preferred alternative and the Corps' technical report can be reviewed at the locations listed below.

## DEPARTMENT OF THE INTERIOR

### Bureau of Reclamation

#### Bay-Delta Advisory Council Meeting

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice of meeting.

**SUMMARY:** The Bay-Delta Advisory Council (BDAC) will meet on April 13, 2000 to discuss CALFED Preferred Program Alternative Recommendation, Governance, Water Management Strategy, Ecosystem Restoration and Updates. These meetings are open to the public. Interested persons may make oral statements to BDAC, or may file written statements for consideration.

**DATES:** The BDAC meeting will be held from 9 a.m. to 5 p.m. on Thursday, April 13, 2000.

**ADDRESSES:** The BDAC will meet at the Sterling Hotel Ballroom, 1300 H Street, Sacramento, CA (916) 448-1300.

**FOR FURTHER INFORMATION CONTACT:** Eugenia Laychak, CALFED Bay-Delta Program, at (916) 657-2666. If reasonable accommodation is needed due to a disability, please contact the Equal Employment Opportunity Office at (916) 653-6952 or TDD (916) 653-6934 at least one week prior to the meeting.

**SUPPLEMENTARY INFORMATION:** The San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Bay-Delta system) is a critically important part of California's natural environment and economy. In recognition of the serious problems facing the region and the complex resource management decisions that must be made, the state of California and the Federal government are working together to stabilize, protect, restore, and enhance the Bay-Delta system. The State and Federal agencies with management and regulatory responsibilities in the Bay-Delta system are working together as CALFED to provide policy direction and oversight for the process.

One area of Bay-Delta management includes the establishment of a joint State-Federal process to develop long-term solutions to problems in the Bay-Delta system related to fish and wildlife, water supply reliability, natural disasters, and water quality. The intent is to develop a comprehensive and
