The Bureau of Land Management (BLM) has submitted the proposed collection of information listed below to the Office of Management and Budget (OMB) for approval under the Provisions of the Paperwork Reduction Act of 1995, 44 U.S.C. 3510 *et seq.* On October 19, 1999, BLM published a notice in the **Federal Register** at 64 FR 56360 requesting comments on this collection. The comment period ended on December 20, 1999. One comment was received in response to that notice. The comment contained information supporting an increase in BLM's burden estimate for certain notices and plans required by the information collection. You may obtain copies of the proposed collection of information and related forms and explanatory material by contacting the BLM Clearance Officer at the telephone number listed below.

Title: Surface Management Activities Under the General Mining Law, Regulations at 43 CFR 3802 and 3809.

OMB Approval Number: 1004-0176.

Abstract: BLM requests an extension of OMB approval to collect certain information from mining claimants and operators who want to prospect, explore, mine and reclaim lands subject to the General Mining Law. This information is contained in the surface management regulations at 43 CFR 3802 and 3809 and three bond forms, Surface Management Surety Bond Form (BLM 3809-1), Surface Management Personal Bond Form (BLM 3809-2), and Generalized Bond Rider Form (BLM 3809-4).

The information requested is associated with filing notices of intent to conduct mining operations, where 5 acres or less of land will be disturbed in any calendar year, and plans of operation, in which exploration and mining activities will disturb more than 5 acres of land in any given year. Information associated with notices includes names and mailing addresses of operators and owners; the serial numbers of all mining claims, mill sites, and tunnel sites; maps showing the location of surface disturbances; and a description of the proposed operation, showing how the operator would conduct the activities. Generally, the greater the surface disturbance, the more detail is required. A full-blown plan of operations would contain descriptions of all proposed and existing access routes, aircraft landing areas, and other means of access; of how the operator will prevent unnecessary and undue degradation of the land; of how the

operator will reclaim the areas disturbed by mining activities; and of measures to be taken to maintain the area in a safe and clean manner and to reclaim the land to avoid erosion and other adverse impacts.

BLM has re-examined its hour burden estimates in response to the public comment received on this collection and in response to six comments on a related information collection for the proposed surface management regulations at 43 CFR 3809 (64 FR 6422, February 9, 1999) and changed the burden estimates accordingly.
