**Proposed Project**

Phase I of the National Evaluation of the Comprehensive Community Mental Health Services for Children and Their Families Program (0930-0171—Extension, revision). The core and comparison studies of the evaluation collect information on child and family demographics, child mental health status, and service system development. In the core study, data were collected from children and families at intake into services, 6 months later, and every 12 months thereafter while the children

remain in services. In the comparison study component, information is collected at intake, 6 months, 12 months, 24 months, and annually thereafter. In both studies, data were collected annually from grantees' administrators and providers.

SAMHSA's Center for Mental Health Services (CMHS) is seeking OMB approval for a 4-month extension of approval for the comparison study of this evaluation of integrated child mental health service systems funded by CMHS to allow sufficient follow-up data

to be collected. The comparison study of the evaluation collects information on child and family demographics, and child mental health status and social functioning. The table below summarizes burden for this extension.
