

b. Eligibility Restoration

32. If a 30 MHz nationwide bidder were to withdraw, eligibility and waivers for all other bidders would be restored to beginning auction levels, except for those nationwide bidders that have withdrawn from the auction by withdrawing their high bids. Without this restoration, few bidders would likely be eligible to bid on licenses withdrawn late in the auction. *See* Allocation of Spectrum Below 5 GHz Transferred from Federal Government Use, ET Docket No. 94-32, *Second Report and Order*, 60 FR 40712 (August 9, 1995), 11 FCC Rcd 624, 652-53, ¶¶ 71-73 (1995). Finally, if the Bureau implements the bid withdrawal procedure outlined here, it will suspend the Part 1 bid withdrawal rule for those applicants that choose to become 30 MHz nationwide bidders. We seek comment on this proposal.

J. Stopping Rule

33. For Auction No. 31, the Bureau proposes to employ a simultaneous stopping rule approach. The Bureau has discretion "to establish stopping rules before or during multiple round auctions in order to terminate the auction within a reasonable time."⁹ A simultaneous stopping rule means that all licenses remain open until the first round in which no new acceptable bids, proactive waivers or withdrawals are received. After the first such round, bidding closes simultaneously on all licenses. Thus, unless circumstances dictate otherwise, bidding would remain open on all licenses until bidding stops on every license.

34. The Bureau seeks comment on a modified version of the simultaneous stopping rule. The modified stopping rule would close the auction for all licenses after the first round in which no bidder submits a proactive waiver, a withdrawal, or a new bid on any license on which it is not the standing high bidder. Thus, absent any other bidding activity, a bidder placing a new bid on a license for which it is the standing high bidder would not keep the auction open under this modified stopping rule. The Bureau further seeks comment on whether this modified stopping rule should be used unilaterally or only in stage three of the auction.

35. We propose that the Bureau retain the discretion to keep an auction open even if no new acceptable bids or proactive waivers are submitted and no previous high bids are withdrawn. In this event, the effect will be the same as if a bidder had submitted a proactive

waiver. The activity rule, therefore, will apply as usual, and a bidder with insufficient activity will either lose bidding eligibility or use a remaining activity rule waiver.

36. Finally, we propose that the Bureau reserve the right to declare that the auction will end after a specified number of additional rounds ("special stopping rule"). If the Bureau invokes this special stopping rule, it will accept bids in the final round(s) only for licenses on which the high bid increased in at least one of the preceding specified number of rounds. The Bureau proposes to exercise this option only in certain circumstances, such as, for example, where the auction is proceeding very slowly, there is minimal overall bidding activity, or it appears likely that the auction will not close within a reasonable period of time. Before exercising this option, the Bureau is likely to attempt to increase the pace of the auction by, for example, moving the auction into the next stage (where bidders would be required to maintain a higher level of bidding activity), increasing the number of bidding rounds per day, and/or increasing the amount of the minimum bid increments for the limited number of licenses where there is still a high level of bidding activity. We seek comment on these proposals.

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed revised information collections. In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)), this notice seeks comments concerning the proposed extension of an existing information collection.

Title: Make Your Mark on the Floodplain-High Water Mark Form.

Type of Information Collection: Extension of a currently approved collection.

OMB Number: 3067-0268.

FEMA Form: 81-101.

Abstract. The Federal Emergency Management Agency (FEMA) has entered into a partnership with the U.S. Army Corps of Engineers (COE) in the Portland District to assist the Agency in providing floodplain management assistance at the most basic and needed level, that of local floodplain managers and the local communities. The joint efforts of FEMA and the COE continue to assure safe and sound developments near floodplains. The Make Your Mark on the Floodplain handout and accompanying High Water Mark Form is used to establish uniform and consistent methodologies for setting and recovering high water marks following a significant flood event. After a major flood, anyone who has high water marks on their property or who has observed flood marks on public property can use the form to record high water mark information, including location, measurements, and description of the marks read. The data will be used by FEMA in post-flood damage assessments. The data will define a frequency/damage relationship for the flooding event and provide calibration information for future analysis. The U. S. Army Corps of Engineers will assist FEMA in collecting and compiling high water mark data.

Affected Public: Individuals and households, business or other for profit, non-profit institutions, farms, and state, local or tribal government.

Number of Respondents: 7,500.

Estimated Time per Respondent: 20 minutes.

Estimated Total Annual Burden Hours: 2,500 hours.

Frequency of Response: On occasion (after each significant flood event).

Comments: Written comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of

⁹ 47 CFR 1.2104(e).
