Science Advisory Board; Emergency Notification of Public Advisory Committee Meeting

Pursuant to the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that a subcommittee of the US EPA Science Advisory Board (SAB) will hold a public meeting on the date and time noted. All times noted are Eastern Standard Time. SAB meetings are open to the public, however, seating is limited and available on a first come basis. *Important Notice:* Documents that are the subject of SAB reviews are normally available from the originating EPA office and are not available from the SAB Office—information concerning availability of documents from the relevant Program Office is included below.

Environmental Engineering Committee (EEC) Teleconference Meeting—June 5, 2000

The Subcommittee on the Diffusion and Adoption of Innovations in Environmental Protection of the Science Advisory Board's (SAB) Environmental Engineering Committee (EEC) will conduct a public teleconference meeting on June 5, 2000 between the hours of 1 and 3 (Eastern Standard Time). The meeting will be coordinated through a conference call connection in room 6013 in the USEPA, Ariel Rios Building North, 1200 Pennsylvania Avenue, NW, Washington, D.C. 20004. The public is encouraged to attend the meeting in the conference room noted above, however, the public may also attend through a telephonic link if lines are available. Additional instructions about how to participate in the conference call can be obtained by calling Ms. Diana Pozun one week prior to the meeting (May 28, 2000) at (202) 564-4544, or via e-mail at pozun.diana@epa.gov.

Purpose of the Meeting—Purpose of the Public Teleconference. The purpose of the public teleconference is to clarify the charge questions for a public workshop being planned for June 28, 2000 and to identify any additional background materials that panel members may need to provide advice to the Agency.

The workshop will be a consultative Workshop on the Diffusion and Adoption of Innovations in Environmental Protection. The purpose of the workshop is to identify how the use of data, theories, and research methods derived from the study of the social process of diffusion and adoption of innovations may improve the adoption of innovative approaches to environmental protection: (a) Within EPA; (b) by state, tribal, and local government partners; and (c) by corporate and non-governmental organization partners in environmental protection. EPA program offices will consider the advice of the workshop panel members in developing strategies to encourage adoption of new strategies for environmental protection especially in the areas of watershed protection, pollution prevention and EPA's Multimedia Strategy for Priority Persistent, Bioaccumulative, and Toxic (PBT) Pollutants, and use of social science tools and cultural profiling.

Charge to the Workshop—The panelists will consider the following charge questions:

(a) What are the different principal process models available for understanding the diffusion process and are some of them more appropriate to the EPA program areas under discussion than others?

(1) What is the role of information and information flow in diffusion and adoption of innovations? How critical are they and how can EPA learn to make them more effective?

(2) What have we learned about designing appropriate incentives for facilitating the adoption process?

(3) How important are social networks to the process of diffusion and adoption of innovation? How can EPA recognize and use them?

(4) What can EPA learn from diffusion efforts undertaken by other partners in environmental protection (state and local agencies, tribes, non-governmental organizations, and corporations)?

(b) What are the principal barriers to diffusion and adoption of innovations in selected EPA program areas? Are there some characteristics intrinsic to certain innovations that make them difficult to diffuse?

(c) How can EPA effectively measure the success of its efforts to encourage diffusion and adoption of innovations?
