[Docket No. ER00-2342-001]

Take notice that on May 26, 2000, Duquesne Light Company (Duquesne) tendered for filing an amendment to its Open Access Transmission Tariff, filed with the Commission on April 28, 2000 in Docket No. ER00-2342-000.

8. Wisconsin Energy Corporation Operating Companies

[Docket No. ER00-1319-002]

On March 28, 2000, the Commission issued an "Order Accepting for Filing and Suspending Proposed Rates, Requiring Compliance Filing, Accepting Revisions to Open Access Tariff and Establishing Hearing Procedures" in the above-docketed proceeding (March 28 Order). Requests for Rehearing were due to be filed on or before April 27, 2000. On April 28, 2000, Wisconsin Energy Corporation Operating Companies (Wisconsin Energy) filed a Request for Rehearing.¹

Section 313(a) of the Federal Power Act² requires an aggrieved party to file a request for rehearing within thirty days after the issuance of the Commission's order. Because the 30-day deadline for requesting rehearing is statutorily based, it cannot be extended and Wisconsin Energy's request for rehearing must be rejected as untimely.

Standard Paragraphs

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Title: EPA Indoor Environmental Quality Questionnaire, OMB Control Number 2060-0244 EPA ICR Number 1619.03, expiration date 5/31/00. This is a request for extension of a currently approved collection.

Abstract: The Indoor Environmental Quality Questionnaire is a component of the EPA indoor air quality (IAQ) research program, used in the Building Assessment Survey and Evaluation (BASE) and related intervention studies. In this program, EPA is studying up to 200 large commercial and public buildings. The purpose of this program is to develop a national baseline assessment of the indoor air in such buildings and to test the effectiveness of current EPA guidance for improving IAQ. The activities EPA will conduct

under this program include an Indoor Environmental Quality Questionnaire, building inspections, interviews with building maintenance workers, environmental measurements (e.g., ventilation rates, concentrations of indoor air pollutants), and other quantitative and qualitative assessments. By conducting this research, EPA will begin to be able to assess the key building parameters that affect IAQ, the incidence of certain IAQ-related health and comfort problems, and effectiveness of strategies to improve IAQ and avoid IAQ problems. The Indoor Environmental Quality Questionnaire is a voluntary and anonymous questionnaire asking for information pertaining to work station characteristics, working conditions, exposure to pollutants, health and well-being, and stress. Data from the Indoor Environmental Quality Questionnaire will be used to compare the measured building parameters and health effects.

Under the existing ICR authority, EPA has used this Questionnaire in 113 buildings to date.
