SUPPLEMENTARY INFORMATION:

Title: EPA Indoor Environmental Quality Questionnaire, OMB Control Number 2060-0244 EPA ICR Number 1619.03, expiration date 5/31/00. This is a request for extension of a currently approved collection.

Abstract: The Indoor Environmental Quality Questionnaire is a component of the EPA indoor air quality (IAQ) research program, used in the Building Assessment Survey and Evaluation (BASE) and related intervention studies. In this program, EPA is studying up to 200 large commercial and public buildings. The purpose of this program is to develop a national baseline assessment of the indoor air in such buildings and to test the effectiveness of current EPA guidance for improving IAQ. The activities EPA will conduct

under this program include an Indoor Environmental Quality Questionnaire, building inspections, interviews with building maintenance workers, environmental measurements (e.g., ventilation rates, concentrations of indoor air pollutants), and other quantitative and qualitative assessments. By conducting this research, EPA will begin to be able to assess the key building parameters that affect IAQ, the incidence of certain IAQ-related health and comfort problems, and effectiveness of strategies to improve IAQ and avoid IAQ problems. The Indoor Environmental Quality Questionnaire is a voluntary and anonymous questionnaire asking for information pertaining to work station characteristics, working conditions, exposure to pollutants, health and well-being, and stress. Data from the Indoor Environmental Quality Questionnaire will be used to compare the measured building parameters and health effects.

Under the existing ICR authority, EPA has used this Questionnaire in 113 buildings to date.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: New Source Performance Standards (NSPS), Subpart TTT, Surface Coating of Plastic Parts for Business Machines; OMB Control Number 2060-0162; expiration date August 31, 2000. The ICR describes the nature of the

information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

SUPPLEMENTARY INFORMATION:

Title: New Source Performance Standards (NSPS), Subpart TTT, Surface Coating of Plastic Parts for Business Machines. OMB Control Number 2060-0162, EPA ICR Number 1093.06, expiration date 8/31/2000. This is a request for extension of a currently approved collection.

Abstract: Industrial surface coating operations emit volatile organic compounds (VOCs) in quantities that the Administrator believes cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Consequently, New Source Performance Standards for the surface coating of plastic parts for business machines were promulgated. VOC emissions from these facilities are the result of operation of the spray booths that apply prime coats, color coats, texture coats or touch-up coats. The standards ensure that owners or operators of these facilities use coatings that contain a low proportion of VOCs, and coating application equipment that provides a high transfer efficiency. In addition, or as an alternative, sources may use control equipment to meet the emission limits. In order to ensure compliance with these standards, adequate recordkeeping is necessary. In the absence of such information, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.
