**SUPPLEMENTARY INFORMATION:**

*Title:* New Source Performance Standards (NSPS), Subpart TTT, Surface Coating of Plastic Parts for Business Machines. OMB Control Number 2060-0162, EPA ICR Number 1093.06, expiration date 8/31/2000. This is a request for extension of a currently approved collection.

*Abstract:* Industrial surface coating operations emit volatile organic compounds (VOCs) in quantities that the Administrator believes cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Consequently, New Source Performance Standards for the surface coating of plastic parts for business machines were promulgated. VOC emissions from these facilities are the result of operation of the spray booths that apply prime coats, color coats, texture coats or touch-up coats. The standards ensure that owners or operators of these facilities use coatings that contain a low proportion of VOCs, and coating application equipment that provides a high transfer efficiency. In addition, or as an alternative, sources may use control equipment to meet the emission limits. In order to ensure compliance with these standards, adequate recordkeeping is necessary. In the absence of such information, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

*Title:* Reporting and Recordkeeping Requirements Under EPA's WasteWise Program, OMB Control No. 2050-0139; EPA ICR No. 1698.04, expiration date July 31, 2000. This is a request for extension of a currently approved collection.

*Abstract:* EPA's voluntary WasteWise program encourages businesses and other organizations to reduce solid waste through waste prevention, recycling, and the purchase or manufacture of recycled-content products. WasteWise participants include Partners, which commit to implementing waste reduction activities of choice, and Endorsers, which choose to promote the WasteWise program and waste reduction to their members. Endorsers, which are typically trade associations or other membership-based organizations, are asked to submit only a one-page form, the Endorser Registration Form. This form identifies the organization, principal contact, and the activities to which the Endorser commits. Partners are asked to fill out

three forms as follows. The Partner Registration Form identifies the organization and the facilities that will participate in WasteWise. Each Partner develops its own waste reduction goals and submits a one-page Goals Identification Form to EPA every three years. Partners also report annually on the progress made toward achieving these goals in the Annual Reporting Form.

The EPA WasteWise program uses the voluntarily submitted information to: (1) Identify and recognize outstanding waste reduction achievements by individual organizations, (2) compile aggregate results that indicate overall accomplishments of WasteWise Partners, (3) identify cost-effective waste reduction strategies to share with other organizations, and (4) identify topics on which to develop assistance and information efforts.

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

### SUPPLEMENTARY INFORMATION:

**Title:** Data Generation for Pesticide Reregistration OMB Control No. 2070-0107, EPA ICR No. 1504.04, expiration date May 30, 2000.

**Abstract:** Pursuant to section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, EPA must assess health and safety data for all pesticide active ingredients originally registered before November 1, 1984, to determine whether such pesticides' use poses unreasonable risks to human health or the environment. In addition, the Federal Food Drug and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996 (FQPA), requires the Agency to reassess all existing tolerances (maximum limits for pesticide residues in food or feed) to ensure that they meet the safety standard in FQPA.

Currently, EPA is implementing Phase 5 of the Reregistration Program. In this final stage, the Agency is actively reviewing the studies submitted for each pesticide and determining whether or not the pesticide is eligible for reregistration—that is, whether the data base is substantially complete, and the pesticide does not cause unreasonable adverse effects to people or the environment when used in accordance with approved labeling. EPA is also reassessing tolerances for any related food uses, and considering whether the pesticide meets the new safety standard in FQPA.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.
