

§ 1211.13 Inherent force activated secondary door sensors.

(a) *Normal operation test.* (1) A force activated door sensor of a door system installed according to the installation instructions shall actuate when the door applies a 15 pound (66.7 N) or less force in the down or closing direction and when the door applies a 25 pound (111.2 N) or less force in the up or opening direction. For a force activated door sensor intended to be used in an operator intended for use only on a sectional door, the force is to be applied by the door against the longitudinal edge of a 1 7/8 (47.6 mm) diameter cylinder placed across the door so that the axis is perpendicular to the plane of the door. See Figure 6 of this part. The weight of the door is to be equal to the maximum weight rating of the operator.

(2) The test described in paragraph (a)(1) of this section is to be repeated and measurements made at various representative points across the width and height of the door. The cycles are not required to be consecutive. Continuous operation of the motor without cooling is not required. For this test, a door sensor system and associated components shall withstand a total of 9 cycles of mechanical operation without failure with the force applied as follows:

(i) At the center at points one, three, and five feet from the floor,

(ii) Within 1 foot of the end of the door, at points one, three, and five feet from the floor,

(iii) Within 1 foot of the other end of the door at points one, three, and five feet from the floor.

(b) *Adjustment of door weight.* (1) With the door at the point and at the weight determined by the tests of paragraphs (a)(2) and (b)(2) of this section to be the most severe, the door sensor and associated components shall withstand 50 cycles of operation without failure.

(2) At the point determined by the test in paragraphs (a)(1) and (a)(2) of this section to be the most severe, weight is to be added to the door in 5.0 pound (2.26 Kg) increments and the test repeated until a total of 15.0 pounds (66.72 N) has been added to the door. Before performing each test cycle, the door is to be cycled 2 times to update the profile. Similarly, starting from normal weight plus 15.0 pounds, the test is to be repeated by subtracting weight in 5.0 pound increments until a total of 15.0 pounds has been subtracted from the door.

13. Redesignated section 1211.14 is amended as follows:

a. In paragraph (a)(4), third sentence, remove the word “that” and add in its place “than”.

b. In paragraph (b)(1) remove the initial word “If” (in paragraph 4 of the installation instructions) and add, in its place “Where”; remove the word “Mount” and add, in its place “For products requiring an emergency release, mount”.

c. In paragraph (b)(2), in the second sentence of paragraph 4 of the safety instructions, remove the number “1” and add in its place the number “1 1/2”.

d. In paragraph (b)(2) before the initial word “If” (in paragraph 5 of the safety instructions), add “For products requiring an emergency release,” and revise the word “If” to read “if”.

14. Redesignated section 1211.15 is amended as follows:

a. In paragraph (g)(1) remove the words “A child may become” and add, in their place “There is a risk of a child becoming”.

b. In paragraph (g)(2)(iv) remove the first word “If” and add, in its place “In the event”.

c. In paragraph (g)(2)(iv) add a second sentence to read “For products not having an emergency release use instead ‘In the event a person is trapped under the door, push the control button’”.

d. In paragraph (g)(3)(i) in the second sentence, remove the word “If” and add in its place “In the event”.

e. In paragraph (i) remove the initial word “A” and add, in its place “Except for door operators complying with § 1211.9(b), a”.

Dated: June 6, 2000.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6335-01-P

SOCIAL SECURITY ADMINISTRATION**20 CFR Parts 404 and 416**

RIN 0960-AF18

Federal Old-Age, Survivors and Disability Insurance; Supplemental Security Income; Determining Disability and Blindness; Revisions to the Growth Impairment Listings

AGENCY: Social Security Administration (SSA).

ACTION: Notice of intent to issue regulations and request for comments.

SUMMARY: This document ask experts on growth impairments in children, and other interested members of the public, for comments on how we should revise

the growth impairment listings in our “Listing of Impairments,” in appendix 1 to subpart P of 20 CFR part 404 (“the listings”). The growth impairment listings contain the medical criteria we use to evaluate disability claims for children with linear growth impairments at the third step of our sequential evaluation of disability for children.

DATES: To be sure your comments are considered, we must receive them no later than August 14, 2000.

ADDRESSES: Comments should be submitted in writing to the Commissioner of Social Security, P.O. Box 17703, Baltimore, MD 21235-7703, sent by telefax to (410) 966-2830; sent by e-mail to regulations@ssa.gov, or delivered to the Office of Process and Innovation Management, Social Security Administration, L2109 West Low Rise Building, 6401 Security Boulevard, Baltimore, MD 21235-6401, between 8:00 A.M. and 4:30 P.M. on regular business days. Comments may be inspected during these hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Regina Connell, Social Insurance Specialist, Office of Disability, 3-A-9 Operations Building, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235-6401; (410) 965-1891 or TTY (410) 966-5609 for information about this notice. For information on eligibility or claiming benefits, call our national toll-free numbers, 1-800-772-1213 or TTY 1-800-325-0778.

SUPPLEMENTARY INFORMATION:**Background**

This notice ask experts on growth impairments in children, and other interested members of the public, for comments that will help us decide how we should revise section 100.00 of the listings. We use the criteria in the listings to evaluate disability claims under both the Social Security disability insurance (title II) and Supplemental Security Income (SSI) (title XVI) programs at the third step of the sequential evaluation processes for adults and children. The listings describe impairments that are considered severe enough to prevent a person from doing any gainful activity. In the case of a child under age 18 seeking SSI benefits based on disability, the listings describe impairments that are considered severe enough to cause marked and severe functional limitations. For more information on the definitions of disability and on the sequential evaluation processes, see 20

CFR §§ 404.1505 and 404.1520 (for title II), 416.905 and 416.920 (for SSI adults), and 416.906 and 416.924 (for children claiming SSI benefits based on disability).

The listings are divided into Part A and Part B. Part A contains medical criteria that we use to evaluate claims filed by individuals age 18 and over. The Part A listings can also apply to children if the disease processes have a similar effect on adults and younger persons. Part B contains medical criteria that apply *only* to children. In both parts, the impairments are grouped by major body systems; e.g., musculoskeletal, cardiovascular, and mental. More complete explanations of the listings and their role in the disability evaluation process are set out in 20 CFR §§ 404.1525 and 404.1526 (for title II) and 20 CFR §§ 416.925, 416.926, and 416.926a (for SSI).

Section 100.00 of the listings is in Part B and contains the medical criteria we use to evaluate linear growth impairments in children. Section 100.00 consists of a preface that explains key concepts used in the section, and two growth impairment listings: 100.02 and 100.03. Listings 100.02 and 100.03 involve only linear growth impairments; i.e., impairments that affect a child's length or height. We also refer to the growth impairment listings in other Part B body systems listings for cases in which certain specified disease processes cause impaired linear growth. For example, in the cardiovascular body system, listing 104.06G provides criteria for evaluating congenital heart disease that is accompanied by growth failure "as described in 100.00." When we revise the current growth impairment listings, we may also have to revise the body system listings that refer to the growth impairment listings.

Other listings do not refer to the linear growth impairment listings in section 100.00, but include weight-related growth criteria. For example, listing 103.02E.6 contains criteria for evaluating bronchopulmonary dysplasia that is accompanied by involuntary weight loss or failure to gain weight at an appropriate rate for the child's age. Several other listings, including listings 104.02D, 105.08, and 114.08I, also include weight-related growth criteria. If we include weight-related criteria in the revised growth impairment listings, we may also have to revise those body system listings that now include weight-related criteria.

We first published the Part B childhood listings, including the growth impairment listings, in the **Federal Register** on March 16, 1977 (42 FR 14705). We made minor changes to the

growth impairment listings on December 6, 1985 (50 FR 50068). Since 1985, we have extended the expiration date for the growth impairment listings without making further revisions. Currently, the growth impairment listings will no longer be effective on July 2, 2001, unless we extend, revise or promulgate them again by publication of a final rule in the **Federal Register** (64 FR 29786). We plan to revise the current growth impairment listings before they expire on July 2, 2001.

We will make revisions to ensure that the criteria in the listings reflect any advances in medical knowledge regarding children with linear growth impairments, and to ensure that the criteria in the listings reflect a level of severity that results in "marked and severe functional limitations."

Request for Comments

Information about growth impairments in children, especially the functional consequences of such impairments, is not readily available. Therefore, we are using this method of requesting comments before formally proposing any revisions to the listings. We want to give interested members of the public an early opportunity to provide us with information about growth impairments in children as we begin the rulemaking process. We are asking experts on growth impairments in children and other interested members of the public for ideas about how we should revise the existing growth impairment listings, including the material in the preface. We are particularly interested in determining if any scientific research shows a relationship between growth impairments and loss of functioning, and whether and how impaired linear growth affects a child's functioning.

In addition, we are interested in comments on whether the criteria for evaluating weight-related impaired growth or failure to thrive in children should be included in revised growth impairment listings, or included in other body system listings as they are now. We are interested in any suggestions about revising those portions of the other body system listings that directly reference the linear growth impairment listings, or that mention a child's growth (including weight) without specifying linear growth or the growth impairment listings.

We will consider your comments along with other information, such as medical research, and our program experience. Based on all of that information, we will decide how to revise the growth impairment listings.

We will not respond to your comments directly. However, when we propose revisions to the growth impairment listings, we will publish a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** and include a formal request for comments. In that case, we will consider and respond to significant comments that we receive in response to the NPRM when we issue any final rules.
