DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Committee on Vital and Health Statistics: Meeting

Pursuant to the Federal Advisory Committee Act, the Department of Health and Human Services announces the following advisory committee meeting.

Name: National Committee on Vital and Health Statistic (NCVHS). Joint Meeting: National Health Information Infrastructure Workgroup and Health Statistics for the 21st Century Workgroup.

Time and Date: 9 a.m. to 5 p.m., July 10, 2000.

Place: The Westin Hotel O'Hare, 6100 River Road, Rosemont, IL 60018.

Status: Open.

Purpose: This meeting will be conducted as a hearing is to solicit opinions for the public, including oral and written testimony, about the issues raised in the interim reports of these two workgroups: "Toward a National Health Information Infrastructure" and "Shaping a Vision for 21st Century Health Statistics." The reports may be downloaded from the NCVHS homepage at <http://www.ncvhs.hhs.gov/>. The hearing will explore the overall concept that a National Health Information Infrastructure (NHII) is a framework that can link health improvements and information technologies. As envisioned in the interim report, the NHII is the set of technologies, standards, applications, systems, values, and law that support all facets of individual health, health care, and public health. The broad goal of the NHII is to deliver information to individuals—consumers, patients, and professionals—when and where they need it, so they can use this information to make informed decisions about health and health care.

The hearing will also seek comments about major trends and issues in population health and their implications for future information needs described in the report, "Shaping a Vision for 21st Century Health Statistics." The report outlines themes that have emerged from national consultations involving health statistics users, public health providers, advocacy groups and health care providers at local, state, and Federal levels. The national consultative process has helped to identify trends and gaps in shaping the vision, as well as cross-cutting issues involved. Ten principles have emerged as essential qualities to developing the health statistics Vision.

Person representing a variety of public and private sector interests will be invited to
