BILLING CODE 4510-29-M

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

Working Group on Long-Term Care: Issues and Solutions, Advisory Council on Employee Welfare and Pension Benefits Plans; Notice of Meeting

Pursuant to the authority contained in section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting will be held Monday, July 17, 2000, of the Advisory Council on Employee Welfare and Pension Benefit Plans Working Group studying Long-Term Care; Issues and Solutions.

The session will take place in Room N-5437, A-D, U.S. Department of Labor Building, Second and Constitution Avenue, NW, Washington, DC 20210. The purpose of the open meeting, which will run from 2 p.m. to approximately 4:30 p.m. is for working group members to take testimony focusing on long-term care policies in the marketplace, policy initiatives that might be undertaken to expand long-term indemnification and future Medicaid expenditures and the Federal Employees Health Benefit Plan initiative to expand LTC indemnification for federal workers.

Members of the public are encouraged to file a written statement pertaining to the topic by submitting 20 copies on or before July 10, 2000, to Sharon Morrissey, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N-5677, 200 Constitution Avenue, NW, Washington, DC 20210. Individuals or representatives of organizations wishing to address the Working Group should forward their request to the Executive Secretary or telephone (202) 219-8753. Oral presentations will be limited to 10 minutes, but an extended statement may be submitted for the record. Individuals with disabilities, who need special accommodations, should contact Sharon Morrissey by July 10, at the address indicated in this notice.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers

will be accepted and included in the record of the meeting if received on or before July 10.

Signed at Washington, DC, this 12th day of June 2000.

Leslie B. Kramerich,

Acting Assistant Secretary, Pension and Welfare Benefits Administration.

Working Group on Benefit Continuity After Organizational Restructuring, Advisory Council on Employee Welfare and Pension Benefits Plans; Notice of Meeting

Pursuant to the authority contained in section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, a public meeting will be held Tuesday, July 18, 2000, of the Advisory Council on Employee Welfare and Pension Benefit Plans Working Group assigned to study benefit continuity after organizational restructuring.

The session will take place in Room N-5437 A-D, U.S. Department of Labor Building, Second and Constitution Avenue, NW, Washington, DC 20210. The purpose of the open meeting, which will run from 2 p.m. to approximately 4:30 p.m., is for working group members to continue taking testimony from plan sponsors who will describe their experiences during restructuring and the issues they faced in any effort to maintain continuity of benefits during their organization's restructuring.

Members of the public are encouraged to file a written statement pertaining to the topic by submitting 20 copies on or before July 10, 2000, to Sharon Morrissey, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N-5677, 200 Constitution Avenue, NW, Washington, DC 20210. Individuals or representatives of organizations wishing to address the Working Group should forward their request to the Executive Secretary or telephone (202) 219-8753. Oral presentations will be limited to 10 minutes, but an extended statement may be submitted for the record. Individuals with disabilities, who need special accommodations, should contact Sharon Morrissey by July 10, at the address indicated in this notice.

Organizations or individuals may also submit statements for the record without testifying. Twenty (20) copies of

such statements should be sent to the Executive Secretary of the Advisory Council at the above address. Papers will be accepted and included in the record of the meeting if received on or before July 10.

Signed at Washington, D.C., this 12th day of June 2000.

Leslie B. Kramerich,

Acting Assistant Secretary, Pension and Welfare Benefits Administration.

BILLING CODE 4510-29-M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting of Recordkeeping Requirements: Office of Management and Budget (OMB) Review

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

1. Type of submission, new, revision, or extension: Revision.

2. The title of the information collection: Proposed rule, "Interim Storage for Greater Than Class C Waste" which would amend 10 CFR part 72, Licensing Requirements for the Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste.

3. The form number if applicable: Not applicable.

4. How often the collection is required: Applications for new licenses and amendments may be submitted at any time. Applications for renewal of licenses would be required every 20 years for an Independent Spent Fuel Storage Installation (ISFSI) and every 40 years for a Monitored Retrievable Storage (MRS) facility. Required recordkeeping would be conducted on a continuing basis.

5. Who will be required or asked to report: Licensees and applicants for a license to possess power reactor-related waste classified for disposal under 10 CFR part 61 as greater than class C (GTCC) in an ISFSI, and the Department of Energy for licenses to receive, transfer, package and possess power reactor-related GTCC waste storage in an MRS.

6. An estimate of the number of responses: 3.

7. The estimated number of annual respondents: 1.

8. An estimate of the total number of hours needed annually to complete the requirement or request: 120 (an average of approximately 115 hours per response for applications plus approximately 5 hours per recordkeeper).

9. An indication of whether section 3507(d), Pub. L. 104-13 applies: Not applicable.

10. Abstract: 10 CFR part 72 establishes requirements, procedures, and criteria for the issuance of licenses to receive, transfer, and possess power reactor spent fuel and other radioactive materials associated with spent fuel storage in an ISFSI, and requirements for the issuance of licenses to the Department of Energy to receive, transfer, package, and possess power reactor spent fuel and high-level radioactive waste, and other associated radioactive materials, in an MRS. This proposed rulemaking would add the ability for licensees to request a specific license to allow the interim storage of reactor-related GTCC waste within an ISFSI or MRS to 10 CFR part 72. GTCC waste is low-level radioactive waste that exceeds the concentration limits of radionuclides established for Class C waste in 10 CFR 61.55. The information will be used by the NRC staff in the licensing process to review applications requesting storage of GTCC waste within an ISFSI or MRS. This rulemaking does not preclude licensees from licensing the storage of GTCC waste under the existing provisions of 10 CFR parts 30 and/or 70. However, the NRC believes that licensing under 10 CFR part 72 would simplify the licensing process and reduce the potential burden on licensees, the NRC, and Agreement States with no adverse affect on public health and safety, or the environment. The revised estimate of burden reflects the time necessary for licensees to amend application request for storage of spent fuel under 10 CFR part 72 to also include GTCC waste.

Submit, by July 17, 2000, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the submittal may be viewed free of charge at the NRC Public Document Room, 2120 L Street, NW (lower level), Washington, DC. The proposed rule indicated in "The title of the information collection" is or has been published in the **Federal Register** within several days of the publication date of this Federal Register Notice. Instructions for accessing the electronic OMB clearance package for the rulemaking have been appended to the electronic rulemaking. Members of the public may access the electronic OMB clearance package by following the directions for electronic access provided in the preamble to the titled rulemaking.

Comments and questions should be directed to the OMB reviewer by July 17, 2000: Erik Godwin, Office of Information and Regulatory Affairs (3150-0132), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be submitted by telephone at (202) 395-3087.

The NRC Clearance Officer is Brenda Jo. Shelton, 301-415-7233.

Dated at Rockville, Maryland, this 1st day of June 2000.

For the Nuclear Regulatory Commission.

Brenda Jo. Shelton,

NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-271]

Vermont Yankee Nuclear Power Corporation; Vermont Yankee Nuclear Power Station Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering amending, pursuant to 10 CFR 20.2002, the previously granted approvals to dispose of slightly contaminated septic waste and cooling tower silt on-site by expanding the allowable waste stream to include slightly contaminated soil generated as a residual by-product of on-site construction activities as requested by Vermont Yankee Nuclear Power Corporation (the licensee), for operation of the Vermont Yankee Nuclear Power Station (Vermont Yankee), located in Windham County, Vermont.

Environmental Assessment

Identification of the Proposed Action

The proposed action would amend the previously granted approvals to dispose of slightly contaminated septic waste and cooling tower silt on-site by expanding the allowable waste stream to include low-levels of radioactively contaminated soil generated as a residual by-product of on-site construction and other activities.

The proposed action is in accordance with the licensee's request dated June 23, 1999, as supplemented on January 4, 2000.

The Need for the Proposed Action

The proposed action is needed to dispose of slightly contaminated soil on-site. The licensee identified 25.5 cubic meters of soil to be disposed of on-site immediately, and approximately 28.3 cubic meters of soil/sand material on an annual basis until the expiration of the plant's operating license in 2013. The 25.5 cubic meters of contaminated soil was generated as a result of on-site construction activities. The anticipated 28.3 cubic meters of soil/sand material will be generated from the annual winter spreading of sand on roads and walkways at the plant site.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that the proposed action will be bound by the conditions for the on-site disposals previously reviewed and approved by the NRC. The licensee will continue to use the designated and approved areas of their property (approximately 1.9 acres in size) that currently receives the septic waste and cooling tower silts. Determination of the radiological dose impact of the new material has been made based on the same dose assessment models and pathway assumptions used in the previously approved submittals. The licensee's proposal was evaluated against the NRC staff's guidelines for on-site disposal and found to be acceptable. The potential exposure to members of the general public from the radionuclides in material was determined to be less than 1 mrem/year, and meets the NRC staff's guidelines. Accordingly, the potential exposures are acceptable.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in occupational or public radiation
