

participate in the growth of the business by collecting a royalty rather than through an ownership interest.

Based on recent statistics for the SBIC program, the circumstances that this proposed rule would address do not appear to apply to most small businesses currently receiving SBIC financing. In fiscal year 1999, SBICs provided financing to 1,983 different small businesses. In approximately two-thirds of all the financings closed during that year, the SBIC obtained an actual or potential equity interest in the small business; even if the proposed rule had been in place, it is unlikely that these transactions would have included royalty provisions. The remaining one-third of SBIC financings typically consist of loans to very small businesses with low growth potential, which are unlikely to have the ability to make royalty payments under any circumstances. Thus, it is unlikely that this proposed rule would affect a substantial number of small entities. The proposed rule is expected to expand financing opportunities for certain small businesses wishing to grow while remaining closely held, rather than make SBIC financing more expensive for small businesses currently being served by the program.

For purposes of Executive Order 12988, SBA has determined that this proposed rule is drafted, to the extent practicable, in accordance with the standards set forth in Section 3 of that Order.

For purposes of Executive Order 13132, SBA has determined that this proposed rule has no federalism implications.

For purposes of the Paperwork Reduction Act, 44 U.S.C. Ch. 35, SBA certifies that this proposed rule contains no new reporting or recordkeeping requirements.

### The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish Class D airspace at Kissimmee, FL. Air traffic controllers at Kissimmee Municipal Airport, FL, are being certificated as weather observers. Therefore, the airport will meet criteria for Class D airspace. Class D surface area airspace is required when the control tower is open to accommodate current SIAPs and for IFR operations at the airport. Class D airspace designations for airspace areas extending upward from the surface are published in Paragraph 5000 of FAA Order 7400.9G, dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

1. The authority citation for Part 71 continues to read as follows:

### § 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9G, Airspace Designations and Reporting Points, dated September 1, 1999, and effective September 16, 1999, is amended as follows:
