#### **SUPPLEMENTARY INFORMATION:**

##### **I. Abstract**

Pursuant to the Antarctic Marine Living Resources Act of 1984, NOAA regulates the harvesting and import of Antarctic marine living resources (AMLR) by U.S. individuals and entities through the issuance of: (1) harvesting and dealer permits for AMLR harvested in the area of the Convention for the Conservation of Antarctic Marine Living Resources (CCAMLR); and (2) harvesting, transshipment and dealer permits for *Dissostichus* species wherever harvested. NOAA also requires the use of *Dissostichus* catch documents for all harvests and transshipments by U.S. fishing vessel masters and all imports by U.S. dealers. Permits are issued, forms are used, and information collected to implement conservation and management measures adopted by the CCAMLR. Research and data collection plans are required of fishers who propose to undertake new or exploratory fisheries. Plans for finfish surveys are required of researchers intending to take more than 50 tons of CCAMLR finfish during the survey. Entry permits are required of individuals who enter a CCAMLR Ecosystem Monitoring (CEMP) site.

##### **II. Method of Collection**

Fishers seeking permits to harvest AMLR species and/or transship *Dissostichus* species submit permit applications to the NMFS. Fishers holding permits and fishing in the

Convention Area are required to make periodic radio contact to report on catches of and effort directed at certain AMLR species. Fishers proposing to conduct a new or exploratory fishery are required to submit information describing the operation. Fishers holding permits to harvest and/or transship *Dissostichus* species submit catch documents. Dealers seeking to import AMLR species or re-export *Dissostichus* species submit permit applications to the NMFS. Dealers holding permits submit import tickets within 24 hours of each import. Dealers holding permits to import *Dissostichus* species forward catch documents completed by the masters of vessels harvesting *Dissostichus* species to the NMFS within 24 hours of import. Researchers who anticipate catches of less than fifty tons of AMLR finfish submit a notification of research vessel activity. Researchers who anticipate catches of greater than fifty tons of AMLR finfish submit plans for finfish surveys. Fishers not required to use a vessel monitoring system will provide positional information by radio contact. Persons proposing to enter a CCAMLR CEMP site submit an application for an entry permit and report annually on CEMP site activity.
