

third-party deliveries under other service agreements.

Texas Eastern proposes to establish an NGA Section 7(c) initial recourse rate, which is a cost based and separately stated incremental reservation rate equal to \$4.461 per Dth per month under Texas Eastern's Rate Schedule FT-1 for the lateral only service to PGET and LEP. Texas Eastern contends that this rate has been designed using Texas Eastern's incremental cost-of-service for this project and is shown on the Pro Forma Rate Schedule FT-1 tariff sheets. Texas Eastern states that it will maintain a separate record of capital costs for this project in its book of accounts.

Notwithstanding the foregoing, PGET, LEP and Texas Eastern have agreed to negotiated rates for both of the services described herein, in accordance with and pursuant to the negotiated rate authority contained in Section 29 of the GT&C of Texas Eastern's FERC Gas Tariff. Texas Eastern states that included in Exhibit P to its application are tariff sheets which identify the negotiated rate agreements. In addition, Texas Eastern states that it included a copy of each negotiated rate agreement in Exhibit I to its application. Texas Eastern requests that the proposed tariff sheets detailing the negotiated rate transactions with PGET and LEP be approved as part of the certificate issued in this proceeding. Texas Eastern requests waiver of Section 154.207 of the Commission's regulations to allow for this effective date. Texas Eastern submits that good cause exists for granting this waiver, as the negotiated rate agreements are integral components of this proposal. According to Texas Eastern, the tariff sheets filed herewith affirm that the actual negotiated rate agreements do not deviate in any material respect from the form of service agreement. Finally, Texas Eastern states that the accounting treatment for negotiated rates will be consistent with Section 29 of the GT&C of Texas Eastern's FERC Gas Tariff.

Since the costs of the proposed facilities will be recovered through the proposed incremental rate, Texas Eastern states that the project will have no adverse impact on existing customers. Texas Eastern states that the project is financially viable without subsidies from Texas Eastern's existing customers, thus meeting the threshold requirements established in the Commission's Policy Statement.

Texas Eastern states that the Columbia Liberty Plant is currently being constructed and is scheduled to take initial test gas commencing September 1, 2001. Texas Eastern requests that the Commission issue a Preliminary

Determination on the non-environmental aspects of its proposal by January 1, 2001 and that a final certificate be issued on or before March 1, 2001. Texas Eastern stated that LEP has informed it that since the Columbia Liberty Plant is currently under construction, significant capital commitments for long lead-time construction items have been made and that receipt of a final certificate by March 1, 2001 is critical. According to Texas Eastern, Issuance of a Preliminary Determination and the authorizations requested herein by January 1, 2001 and March 1, 2001, respectively, will provide LEP with assurance regarding connection to the gas grid, which is necessary to fuel the Columbia Liberty Plant and enable LEP to continue to pursue construction and related activities required to meet the September 1, 2001 schedule for test gas for the Columbia Liberty Plant.

Any person desiring to be heard or to make protest with reference to said application should on or before August 10, 2000, file with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. The Commission's rules require that protestors provide copies of their protests to the party or parties directly involved. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's rules.

A person obtaining intervenor status will be placed on the service list maintained by the Commission and will receive copies of all documents issued by the Commission, filed by the applicant, or filed by all other intervenors. An intervenor can file for rehearing of any Commission order and can petition for court review of any such order. However, an intervenor must submit copies of comments or any other filing it makes with the Commission to every other intervenor in the proceeding, as well as 14 copies with the Commission.

A person does not have to intervene, however, in order to have comments considered. A person, instead, may submit two copies of comments to the Secretary of the Commission.

Commenters will be placed on the Commission's environmental mailing list, will receive copies of environmental documents and will be able to participate in meetings associated with the Commission's environmental review process. Commenters will not be required to serve copies of filed documents on all other parties. However, commenters will not receive copies of all documents filed by other parties or issued by the Commission and will not have the right to seek rehearing or appeal the Commission's final order to a federal court.

The Commission will consider all comments and concerns equally, whether filed by commenters or those requesting intervenor status.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Commission by Sections 7 and 15 of the NGA and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Texas Eastern to appear or be represented at the hearing.

David P. Boerger,
Secretary.

Puget Sound states that a copy of the filing was served upon Avista.

Comment date: August 4, 2000, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection. This filing may also be viewed on the Internet at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance).

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Project No. 184-060]

El Dorado Irrigation District; Notice of Availability of Final Environmental Assessment

July 20, 2000.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has prepared a final environmental assessment (FEA). The FEA was prepared in support of Commission action on a proposed license amendment for the El Dorado Project. The proposed amendment would allow the reconstruction of the project's diversion dam and construction of a two-mile-long tunnel to bypass a section of the project's canal that is damaged and/or situated on unstable slopes. The FEA finds that approval of the proposed amendment, with staff's recommended mitigation measures, would not constitute a major federal action significantly affecting the quality of the human environment. The El Dorado Project is located on the South Fork of the American River, in El Dorado, Amador, and Alpine counties, California.

On March 24, 2000 the Commission staff issued a draft environmental assessment (DEA) for the project, and requested that comments be filed with the Commission within 45 days. Comments were filed by six entities and are addressed in the FEA for the project.

The FEA was written by staff in the Office of Energy Projects, Federal Energy Regulatory Commission. Copies of the DEA and FEA can be viewed at the Commission's Reference and Information Center, Room 2A, 888 First Street, N.E., Washington, D.C. 20426, or by calling 202-208-1371. The document can be viewed on the web at <http://rimsweb1.ferc.fed.us/rims> (call 202-208-2222 for assistance). Copies also can be obtained by calling the project manager, John Mudre, at (202) 219-1208.
