

plan did not appear to constitute the type of Consensus Plan originally envisioned by the Commission. The LMCC subsequently modified its plan. The "modified" Consensus Plan, submitted August 21, 1997, reserves 104 of the current 12.5 kHz offset channel pairs (and channel pairs 6.25 kHz directly above and below these channel pairs) specifically for low power operation—ninety (90) channel pairs in the Industrial/Business Pool and fourteen (14) channel pairs in the Public Safety Pool.

2. In the *Second Memorandum Opinion and Order*, 64 FR 36258 April 6, 1999, in the *Refarming proceeding*, the Commission stated that once it was satisfied that the LMCC plan is viable and consistent with the rules, the Wireless Telecommunication Bureau (WTB) would issue a Public Notice stating that the plan has been accepted. The Commission noted, however, that it

would defer its acceptance of the LMCC low power plan until the matter concerning interference to medical telemetry is resolved.

3. On June 8, 2000, the Commission adopted a *Report and Order*, 65 FR 43995 July 17, 2000, ET Docket No. 99–255. This proceeding established a Wireless Medical Telemetry Service under part 95, of the Commission's rules, and allocated spectrum for medical telemetry operations. In addition, the *Report and Order* in this proceeding stated that the Commission would lift the freeze on high power use of the 12.5 kHz offset channels in the 450–460 MHz segment of the 450–470 MHz PLMR band based on the limited usage of this segment for medical telemetry. The Report and Order in this proceeding noted that WTB would issue a Public Notice concerning the details of lifting the freeze.

4. The *Public Notice* announces acceptance of LMCC's modified low

power Consensus Plan. We will license only low power operations on the specified frequencies pursuant to § 90.267 of the Commission's Rules. A list of the 12.5 kHz offset frequencies in the 450–470 MHz band designated for low power use is attached to this document as Appendix A. Each frequency coordinator must maintain a current listing of frequencies designated for low power and make it available to the public upon request. As noted in the Refarming proceeding, the coordinators, by consensus, may change this list in the future.
