

information or documentation indicating that a review or reconsideration is warranted. If a nation has not imported in the previous 6 months yellowfin tuna or yellowfin tuna products that are subject to a ban on direct importation into the United States under section 101(a)(2)(B), the nation shall no longer be considered an intermediary nation, and these import restrictions shall no longer apply. The status of a nation as an intermediary nation will remain valid until the Assistant Administrator has sufficient evidence that a nation is not importing yellowfin tuna or tuna products subject to a direct ban under section 101(a)(2)(B) of the MMPA. The Assistant Administrator may require the submission of additional supporting documentation or verification of statements made in connection with requests to review or change the status of an intermediary nation.

As a reminder, the interim final regulations implementing the IDCPA (65 FR 30, January 3, 2000) also set forth a mechanism for lifting primary embargoes against nations harvesting yellowfin tuna in the ETP purse seine fishery. Harvesting or exporting nations, if different, must submit documentary evidence directly to the Assistant Administrator and request an affirmative finding as required by 50 CFR 216.24(f)(9). The affirmative finding process requires that the harvesting nation meet several conditions related to compliance with the International Dolphin Conservation Program (IDCP). To issue an annual affirmative finding, NMFS must receive the following information:

1. A statement requesting an affirmative finding;
2. Evidence of membership in the Inter-American Tropical Tuna Commission (IATTC);
3. Evidence that a nation is meeting its obligations to the IATTC, including financial obligations;
4. Evidence that a nation is complying with the IDCP. For example, national laws and regulations implementing the Agreement on the IDCP and information that the nation is enforcing those laws and regulations;
5. Evidence of a tuna tracking and verification program comparable to the U.S. tracking and verification regulations at 50 CFR 216.94;
6. Evidence that the national fleet dolphin mortality limits (DMLs) were not exceeded in the previous calendar year;
7. Evidence that the national fleet per-stock per-year mortality limits, if they are allocated to countries, were not exceeded in the previous calendar year;

8. Authorization for the IATTC to release to the Assistant Administrator for Fisheries complete, accurate, and timely information necessary to verify and inspect Tuna Tracking Forms; and

9. Authorization for the IATTC to release to the Assistant Administrator for Fisheries information whether a nation is meeting its obligations of membership to the IATTC and whether a nation is meeting its obligations under the IDCP, including managing (not exceeding) its national fleet DMLs or its national fleet per-stock per-year mortality limits. A nation may opt to provide this information directly to NMFS on an annual basis or to authorize the IATTC to release the information to NMFS in years when NMFS will review and consider whether to issue an affirmative finding determination without an application from the harvesting nation.
