

under section 751 of the Act or determination under section 753 of the Act, or (4) any other information placed on the record. We have determined to use the highest rate determined in any segment of the proceeding, 44.20 percent.

Section 776(c) of the Act provides that the Department shall, to the extent practicable, corroborate secondary information using independent sources reasonably at its disposal. The Statement of Administrative Action, H.R. Doc. No. 103-316, 870 (1994) (SAA) provides that "corroborate" means simply that the Department will satisfy itself that the secondary information to be used has probative value. *See SAA*, at 870.

In accordance with section 776(c) of the Act, to corroborate secondary information the Department will, to the extent practicable, examine the reliability and relevance of the information to be used. In this case, we have chosen to use the highest rate from any segment of the proceeding, which has been the "all others rate" throughout this proceeding, was used as the best information available rate for Nippon and Sumitomo in the investigation, and was used as the adverse FA rate for NKK in a previous review of this order (see OCTG Review 1). We corroborated the rate, which was originally taken from the petition, in OCTG Review 1, explaining: "That rate was based upon the difference between U.S. price of a representative OCTG product sold by one Japanese company and constructed value for that product. Our review of the information in the original petition pertaining to the price of the product and to the major inputs (e.g., iron ore, coke, scrap) and processes (ironmaking, steelmaking, and bloom and pipe production) used for the production of the final merchandise did not indicate that the analysis of the OCTG market in the petition is no longer appropriate to use as a basis for facts available." 62 FR at 25890. Nothing on the record of this review suggests that the rate we have selected does not represent reliable and relevant information. Moreover, because these four non-responding companies did not answer our questionnaire, we have no basis for comparing the circumstances of their sales, if they had any, to those facts submitted in the petition to ensure that the selected adverse FA rate is relevant. Furthermore, as this is the rate currently applicable to these respondents, we presume that if any of them could have demonstrated that its margin is lower, it would have participated and attempted to do so. Thus, in accordance with section 776(c),

we have corroborated this rate "to the extent practicable."

Preliminary Results of the Review

We preliminarily determine that the following weighted-average dumping margins exist:

Exporter/manufacturer	Per- cent ¹
Hallmark Tubulars Ltd	44.20
Itochu Corp	44.20
Itochu Project Management Corp	44.20
Nippon Steel Corp	44.20

¹ Weighted-average margin percentage.

Any interested party may request a hearing within 30 days of publication of this notice. Pursuant to 19 CFR 351.310(d), any hearing, if requested, will be held 44 days after the publication of this notice, or the first workday thereafter. Interested parties may submit case briefs within 30 days of the date of publication of this notice. Rebuttal briefs, which must be limited to issues raised in the case briefs, may be filed not later than 37 days after the date of publication. The Department will publish a notice of final results of this administrative review, which will include the results of its analysis of issues raised in any such comments, not later than 120 days after the date of publication of this notice.

Upon issuance of the final results of review, the Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Upon completion of this review, the Department will issue appraisal instructions directly to the Customs Service.

Furthermore, the following deposit rates will be effective upon publication of the final results of these reviews for all shipments of OCTGs from Japan entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for the reviewed companies will be the rates established in the final results of these reviews; (2) for merchandise exported by manufacturers or exporters not covered in these reviews but covered in the original investigation of sales at less than fair value (LTFV) or a previous review, the cash deposit will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this or a previous review, or the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) for all other

producers and/or exporters of this merchandise, the cash deposit rate shall be 44.20 percent, the "all others" rate established in the LTFV investigation (58 FR 7531, February 8, 1993).

These deposit rates, when imposed, shall remain in effect until publication of the final results of the next administrative review. This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are issued and published in accordance with sections 751(a)(1) and (a)(2)(C) of the Act (19 USC 1675(a)(1) and (a)(2)(C)), and 19 CFR 351.221(b)(4).
