Policy Regarding Controlled Propagation of Species Listed Under the Endangered Species Act

AGENCIES: Fish and Wildlife Service, Interior; National Marine Fisheries Service, Commerce.

ACTION: Notice of policy.

SUMMARY: This policy, published jointly by the Fish and Wildlife Service (FWS) and the National Marine Fisheries

Service (NMFS), jointly referred to as the Services, addresses the role of controlled propagation in the conservation and recovery of species listed as endangered or threatened under the Endangered Species Act of 1973 (as amended) (Act). The policy provides guidance and establishes consistency for use of controlled propagation as a component of a listed species recovery strategy. This policy will help to ensure smooth transitions between various phases of conservation efforts such as propagation, reintroduction and monitoring, and foster efficient use of available funds. The policy supports the controlled propagation of listed species when recommended in an approved recovery plan or when necessary to prevent extinction of a species. Appropriate uses of controlled propagation include supporting recovery related research, maintaining refugia populations, providing plants or animals for reintroduction or augmentation of existing populations, and conserving species or populations at risk of imminent extinction or extirpation.

DATES: The final policy on controlled propagation is effective October 20, 2000.

ADDRESSES: You may view comments and materials received during the public comment period for the draft policy

document by appointment during normal business hours in Room 420, 4401 North Fairfax Drive, Arlington, Virginia 22203.

FOR FURTHER INFORMATION CONTACT:

David Harrelson, Division of Endangered Species, U.S. Fish and Wildlife Service at the above address (703/358-2171) or by e-mail at David_Harrelson@fws.gov; or Marta Nammack, Office of Protected Resources, National Marine Fisheries Service (301/713-1401) or by e-mail at Marta.Nammack@noaa.gov.

SUPPLEMENTARY INFORMATION: The Endangered Species Act specifically charges us with the responsibility for identification, protection, management, and recovery of species of plants and animals in danger of extinction. Fulfilling this responsibility requires the protection and conservation of not only individual organisms and populations, but also the genetic and ecological resources that listed species represent. Long-term viability depends on maintaining genetic adaptability within each species. Species, as defined in section 3(15) of the Act, includes "any subspecies of fish or wildlife or plants, and any distinct population segment of any species of vertebrate fish or wildlife which interbreeds when mature." Though the Act emphasizes the restoration of listed species in their
