SUPPLEMENTARY INFORMATION:

Title: Detergent Gasoline: Certification Requirements for Manufacturers of Detergent Additives; Transferors and Transferees of Detergent Additives; Blenders of Detergents into Gasoline or Post-refinery Component; Manufacturers, Transferors, and Transferees of Gasoline or Post-refinery Component (40 CFR part 80—subpart G), EPA ICR Number 1655.04, OMB Control Number 2060-0275, expiration date: 9-30-00. This is a request for an extension of a currently approved collection.

Abstract: Gasoline combustion results in the formation of engine deposits that contribute to increased emissions. Detergent additives deter deposit formation. The Clean Air Act requires gasoline to contain a detergent additive. The regulations at 40 CFR part 80—subpart G specify certification requirements for manufacturers of detergent additives, recordkeeping or reporting requirements for blenders of detergents into gasoline or post-refinery component (any gasoline blending stock or any oxygenate which is blended with gasoline subsequent to the gasoline refining process), and reporting or recordkeeping requirements for manufacturers, transferors, or transferees of detergents, gasoline, or post-refinery component (PRC). These requirements ensure that (1) a detergent is effective before it is certified by EPA, (2) a certified detergent, at the minimum concentration necessary to be effective (known as the lowest additive concentration (LAC), is blended into gasoline, and (3) only gasoline which contains a certified detergent at its LAC is delivered to the consumer. The EPA maintains a list of certified gasoline detergents, which is publicly available. As of March 2000 there were approximately 225 certified detergents and 16 detergent manufacturers.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed at 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information, was published on May 10, 2000 (65 FR 30109); no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 3.2 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: (1) Manufacturers of gasoline, post-refinery component, or detergent additives, (2) blenders of detergent additives into gasoline or post-refinery component, and (3) transferors or transferees of detergent additives, gasoline, or post-refinery component.

Estimated Number of Respondents: 1,374.

Frequency of Response: On occasion and monthly.

Estimated Total Annual Hour Burden: 223,008 hours.

Estimated Total Annualized Capital, O&M Cost Burden: \$500.00.

SUPPLEMENTARY INFORMATION:

Title: National Pollutant Discharge Elimination System (NPDES) Compliance Assessment/Certification Information (OMB Control No. 2040-0110; EPA ICR No. 1427.06) expiring on September 30, 2000. This is a request for extension of a currently approved collection.

Abstract: This ICR updates the burden and costs associated with the data

requirements necessary for a permitting authority to determine whether an existing NPDES or sewage sludge permittee is in compliance with the conditions of its permit for the discharge of pollutants to waters of the United States or for the use or disposal of sewage sludge. Most compliance assessment data is generated by permittees and submitted to the appropriate permitting authority. The permitting authority uses the information to determine compliance with permit conditions and if any noncompliance poses a threat to human health or the environment. If noncompliance is detected, the permitting authority will take the appropriate enforcement action based on the frequency and the degree of seriousness of the violation.

This ICR calculates the burden associated with compliance assessment information (other than discharge monitoring reports) required by parts 122 and 501 and certification or alternative requirements contained in the effluent limitations guidelines and standards regulations for various point source categories. These requirements include routine submittals, such as annual certifications and reports submitted when a compliance schedule milestone is reached; non-routine submittals, such as an unanticipated bypass; and certifications for exemptions of monitoring requirements for certain industrial categories.

Where information submitted contains trade secrets or similar confidential business information, the respondent has the authority to request that this information be treated as confidential business information. All data so designated will be handled pursuant to 40 CFR part 2. Pursuant to section 308(b) of the Clean Water Act, effluent data may not be treated as confidential.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 03/23/00 (65 FR 15633); two comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2.15 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain,

or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: state and local governments, tribes, private industry, public and private entities

Estimated Number of Respondents: 16,532.

Frequency of Response: varies.

Estimated Total Annual Hour Burden: 1,026,264 hours.

Estimated Total Annualized Capital and Operating & Maintenance Cost Burden: \$0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the addresses listed above. SUPPLEMENTARY INFORMATION:

Title: Pesticide Product Registration Maintenance Fee (EPA No. 1214.05; OMB Control No. 2070-0100).

Request: This is a request for the extension of an existing collection activity, the approval for which is currently scheduled to expire on September 30, 2000. Under 5 CFR 1320.10(e)(2), the Agency may continue to conduct or sponsor the collection of information while the submission is pending at OMB.

Abstract: This information collection program provides a practical means of communication between the pesticide registrants and the Agency to facilitate the proper collection of the pesticide product registration maintenance fees as required by section 4(i)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. Each registrant of a pesticide product originally registered before November 1, 1984 is required to complete a filing form and submit their fee payment by January 15 of each year. The pesticide registrant (respondents) complete and submit EPA Form 8570-30 indicating the respondent's liability for the registration maintenance fee for pesticide products registered by that firm. The failure to pay the required fee for a product will result in cancellation of that product.
