

Table IV as an ARM index rate.¹ Should any ARM be linked to a mortgage rate for a metropolitan area that will be deleted from the regular quarterly table, the Finance Board proposes as the successor index the National Average Contract Mortgage Rate for the Purchase of All Homes by Combined Lenders the successor index if that ARM index is a contract rate from Table IV. It also proposes to designate the National Average Effective Mortgage Rate for the Purchase of All Homes by Combined Lenders to be the successor index for any ARM index that is an effective rate from Table IV. The Finance Board publishes both of the proposed successor index rates in the top panel of Table I in the monthly MIRS release, and the current value of both interest rates is available on a recording maintained by the Finance Board. This particular designation would apply only to those metropolitan areas that the Finance Board would delete from the regular quarterly Table IV.

The Finance Board seeks comments on these proposed successor index rates.

F. Effective Date and Transition Provisions

If the Finance Board adopts the MIRS weighting changes described above, it would implement the changes effective with the January 2001 data to allow the data for a whole calendar year to be calculated using the same sampling and weighting methodology. Before implementing any changes, the Finance Board would employ the services of a statistician to ensure the appropriateness of the MIRS sampling and weighting methodology.

The Finance Board also would make available special tabulations so that Fannie Mae and Freddie Mac would have data calculated on the same basis for their determination of the conforming loan limit for 2002. This calculation would occur in November 2001.

Dated: September 18, 2000.

By the Federal Housing Finance Board.

James L. Bothwell,
Managing Director.
