

On May 12, 1997, the CIT affirmed the final revised remand determinations in *Thyssen Stahl AG v. United States* Slip Op. 97-55 (May 12, 1997). That decision was appealed. On July 27, 1998, the CAFC affirmed the decision of the CIT in *Thyssen Stahl AG v. United States*, Slip Op. 97-1509 (July 27, 1998).

In light of the final and conclusive court decision in this action, we are amending the "all others" cash deposit rate from 19.03% to 21.66% ad valorem for cold-rolled and from 4.18% to 10.02% ad valorem for corrosion resistant carbon steel flat products from Germany. We are not amending the cash deposit rates for Thyssen because they have been superseded by subsequent administrative reviews for this company.

Amended Final Determination

As there is now a final and conclusive court decision in this action, we are amending the amended final determinations on certain cold-rolled and corrosion resistant carbon steel flat products from Germany, pursuant to section 516A(e) of the Act. As a result of these remand redeterminations, the recalculated final weighted-average margins are as follows:

Manufacturer/producer/exporter	Margin percentage
Cold-Rolled:	
Klockner Stahl GmbH	23.54
Thyssen Stahl AG	20.64
All Others	21.66
Corrosion Resistant:	
Thyssen Stahl AG	10.02
All Others	10.02

Cash Deposit Instructions

The "all others" cash deposit rates of 21.66% ad valorem for cold-rolled and 10.02% ad valorem for corrosion resistant carbon steel flat products from Germany will be effective upon publication of this notice of amended final determinations on all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date.

These amended final determinations and notice are in accordance with sections 736(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.20(a)(4) (1994).

Dated: September 20, 2000.

Troy H. Cribb,

Acting Assistant Secretary for Import Administration.

Final Results of Full Sunset Review: Silicomanganese From Ukraine

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of final results of full sunset review: silicomanganese from Ukraine.

SUMMARY: On May 30, 2000, the Department of Commerce ("the Department") published a notice of preliminary results of the full sunset review of the suspended antidumping investigation on silicomanganese from Ukraine (65 FR 34440) pursuant to section 751(c) of the Tariff Act of 1930, as amended ("the Act"). We provided interested parties an opportunity to comment on our preliminary results. We did not receive comments from either domestic or respondent interested parties. As a result of this review, the Department finds that termination of the suspended antidumping investigation would be likely to lead to continuation or recurrence of dumping at levels indicated in the *Final Results of Review* section of this notice.

EFFECTIVE DATE: September 27, 2000.

FOR FURTHER INFORMATION CONTACT: Martha V. Douthitt, Office of Policy for Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, D.C. 20230; telephone: (202) 482-5050 or (202) 482-3330, respectively.

Statute and Regulations

Unless otherwise indicated, all citations to the Act are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act ("URAA"). In addition, unless otherwise indicated, all citations to the Department regulations are to 19 CFR Part 351 (1999). Guidance on methodological or analytical issues relevant to the Department's conduct of sunset reviews is set forth in the Department's Policy Bulletin 98.3—*Policies Regarding the Conduct of Five-year ("Sunset") Reviews of Antidumping and Countervailing Duty Orders*; Policy Bulletin, 63 FR 18871 (April 16, 1998) ("Sunset Policy Bulletin").

Background

On May 30, 2000, the Department of Commerce ("the Department")

published in the **Federal Register** a notice of preliminary results of the full sunset review of the suspended antidumping investigation on silicomanganese from Ukraine, pursuant to section 751(c) of the Act. In our preliminary results, we found that termination of the suspended antidumping investigation would be likely to lead to continuation or recurrence of dumping, and we preliminarily determined the following dumping margin likely to prevail if the suspended antidumping investigation were terminated:

Manufacturers/Exporters	Margin (percent)
Country-wide	163.00

We did not receive a case brief on behalf of either domestic or respondent interested parties within the deadline specified in 19 CFR 351.309(c)(1)(i).

Scope of Review

The merchandise covered by this sunset review is silicomanganese. Silicomanganese, which is sometimes called ferrosilicon manganese, is a ferroalloy composed principally of manganese, silicon, and iron, and normally containing much smaller proportions of minor elements, such as carbon, phosphorous, and sulfur. Silicomanganese generally contains by weight not less than four percent iron, more than 30 percent manganese, more than eight percent silicon, and not more than three percent phosphorous. All compositions, forms, and sizes of silicomanganese are included within the scope of this review, including silicomanganese slag, fines, and briquettes. Silicomanganese is used primarily in steel production as a source of both silicon and manganese. This sunset review covers all silicomanganese, regardless of its tariff classification. Most silicomanganese is currently classifiable under subheading 7202.30.0000 of the Harmonized Tariff Schedule of the United States ("HTSUS"). Some silicomanganese may also currently be classifiable under HTSUS subheading 7202.99.5040. Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the subject merchandise remains dispositive.

Analysis of Comments Received

The Department did not receive case briefs from either domestic or respondent interested parties. Therefore, we have not made any changes to our

preliminary results of May 30, 2000 (65 FR 34440).

Final Results of Review

As a result of this review, the Department finds that termination of the suspended antidumping investigation on silicomanganese from Ukraine would be likely to lead to continuation or recurrence of dumping at the level listed below:

Manufacturers/Exporters	Margin (percent)
Country-wide	163.00

This notice also serves as the only reminder to parties subject to administrative protective orders ("APO") of their responsibility concerning the return or disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305 of the Department's regulations. Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This five-year ("sunset") review and notice are in accordance with sections 751(c), 752, and 777(i)(1) of the Act.

Dated: September 21, 2000.

Troy H. Cribb,

Acting Assistant Secretary for Import Administration.

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of

Commerce, 14th Street and Constitution Avenue, NW, Washington, DC.

Docket Number: 00-021. *Applicant:* University of Florida, Materials Science and Engineering, Post Office Box 116400, Gainesville, FL 32611-6400.

Instrument: Electron Microscope, Model JEM-2010F. *Manufacturer:* JEOL Ltd., Japan. *Intended Use:* The instrument is intended to be used to study the microstructure of metals, metal alloys, ceramics, high-temperature superconductors, semiconductors, polymers, clays, dental implants and soot emissions while conducting the following representative experiments:

1. Structure-property relationships in semiconducting materials.
2. Interface phenomena in oxides.
3. Analysis of interfaces in advanced polymers and photonic devices.
4. The structure of high-temperature materials.
5. Mechanical properties of dental implants.
6. Polymer-protein and polymer-cell interactions.
7. Nanoscale properties of porous silicon.
8. Structure and chemistry of oxide minerals.
9. Structure-property relationships in opto-electronic materials.
10. Strength/hardness enhancement in superlattices.

In addition, the instrument will be used on a one-to-one basis for training of faculty, staff and graduate students. Application accepted by Commissioner of Customs: June 9, 2000.

Docket Number: 00-027. *Applicant:* Emory University, Department of Biology, 2006 Rollins Research Center, 1510 Clifton Road, Atlanta, GA 30322. *Instrument:* Slice Physiology Setup. *Manufacturer:* Luigs and Neumann, Germany. *Intended Use:* The instrument is intended to be used to do electrophysiological studies using rat brain slices. The experiments consist of preparing slices of rat brain, putting them under the microscope and inserting microelectrodes into single nerve cells. Once the microelectrode is inserted, a fluorescent dye will be injected into the cell body to visualize fine dendritic processes. The microscope will then be moved to focus on one of the visualized fine processes, and a second electrode can be inserted into the same cell. The main objective of this research is to understand neuronal activity and information processing in the mammalian brain. In particular, nerve cells in brain structures involved in a motor control will be studied. In addition, the instrument will be used for educational

purposes in the course Bio. 498 Guided Research for Senior Undergraduate Students. Application accepted by Commissioner of Customs: September 5, 2000.

Docket Number: 00-028. *Applicant:* Ernest Orlando Lawrence Berkeley National Laboratory, One Cyclotron Road, Berkeley, CA 94720. *Instrument:* Electron Microscope, Model JEM-3010. *Manufacturer:* JEOL Ltd., Japan. *Intended Use:* The instrument is intended to be used for studies of the microstructure and microstructural evolution of metals, metal alloys, ceramics, electronic and opto-electronic materials and nanocomposites. The experiments will include:

1. In-situ microscopy—real time evolutions of structure/property/processing relationships.
2. Real time high-resolution electron microscopy.
3. Dislocation and defect studies in materials.
4. Identification of phases and crystal structure by electron diffraction and convergent beam electron diffraction.

In addition, the instrument will be used for significant one-to-one educational use between the staff and users on how to exploit transmission electron microscopy to solve materials problems. Application accepted by Commissioner of Customs: September 5, 2000.

Frank W. Creel,

Director, Statutory Import Programs Staff.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 092100D]

Mid-Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council (MAFMC) and its Comprehensive Management Committee, Executive Committee, Law Enforcement Committee, Demersal Committee, Squid-Mackerel-Butterfish Committee, and Habitat Committee will hold a public meeting.

DATES: The meetings will be held on Tuesday, October 10, 2000, to Thursday, October 12, 2000.
